

RM Products Ltd.

Underground Office- A Case Study

RM Products Ltd. is the leading manufacturer of modular fiberglass enclosures. Our modular buildings are the perfect solution for getting buildings into difficult to reach or remote locations. RM's buildings are strong, non-corrosive, versatile, lightweight, easy to ship and assemble.

A mining company reached out to our team at RM. They needed an underground office that could be built on site in a potentially difficult location. We worked with our client to design an 8'x8' enclosure in component kit form.

The client opted for fiberglass entry door with a plexiglass window. They were able to assemble the office quickly and easily within the mine.

From concept to final product RM's CAD design and support team provide a total solution to your equipment enclosure needs.

Features & Benefits:

Modular Design - Portable - Quick Assembly Time - Easy Shipping and Off Loading - Minimal Site Preparation - Mold & Mildew Resistant - Long Term Durability - Insulated Buildings - Virtually Maintenance Free - Light Weight - High Strength to Weight Ratio - Easy to Repair - Spray Washable Inside & Out - Ability to Assemble in Difficult Locations Where Construction is Constrained - Electrics, Lighting and HVAC Options Are Available - Meets Building Codes Throughout North America
