

RM Products non-corrosive Fiberglass Buildings are perfect for any auto, truck, bus and train wash systems. You already know the advantages of fiberglass in a wet environment and RM's panels are fiberglass both inside and out. In addition, all hardware used is stainless steel. Our insulated, buildings are easily assembled and can stand alone or be attached to an existing building. We can supply your preferred doors or you can supply your own door. RM's buildings have so many great features but the one that we want to point out is that the buildings can be easily surface mounted wired, saving you or your client money! Check out our website, videos and then let RM Products Ltd. design and manufacture your vehicle wash building!
