Safely Carry & Load Poles in any terrain and all weather conditions. Load poles up to 80'!

East Central Energy

Braham, MN

Operator Friendly

The EZ SPOT UR Pole Setter makes a skid steer a Super Digger Derrick at a fraction of the cost of a real one.

Why waste your money when time is important? The EZ SPOT UR will help you get the job done. A Digger Derrick stuck in the mud will only cost you time and money and waste valuable crew man hours.

The answer for the managers recently arrived at the co-op in the form of four compact track loaders equipped with post hole auger, pallet forks and bucket attachments, plus the EZ SPOT UR device used to set poles."

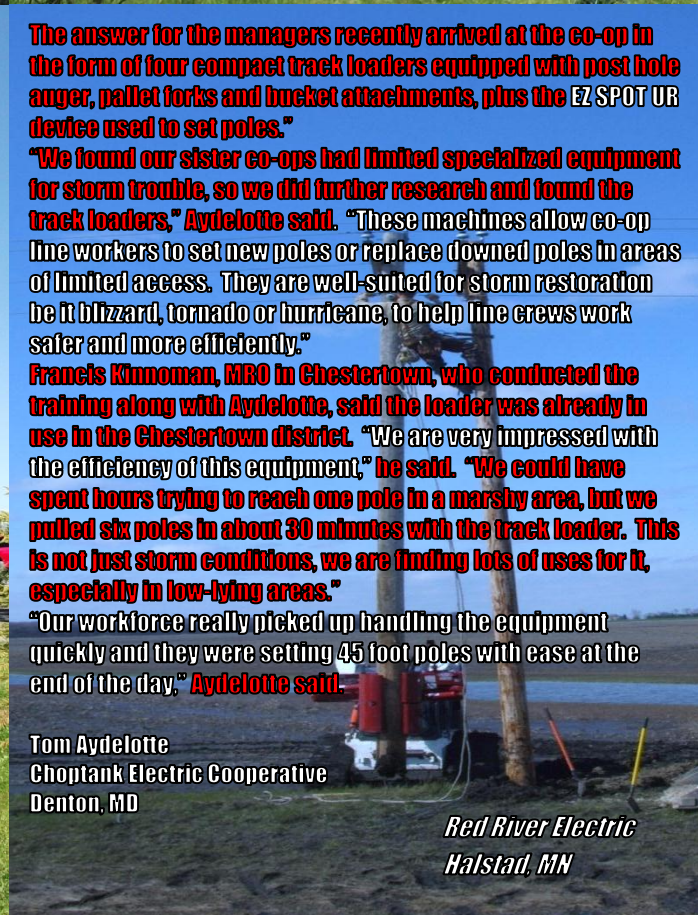

"We found our sister co-ops had limited specialized equipment for storm trouble, so we did further research and found the track loaders," Aydelotte said. "These machines allow co-op line workers to set new poles or replace downed poles in areas of limited access. They are well-suited for storm restoration be it blizzard, tornado or hurricane, to help line crews work safer and more efficiently."

Francis Kinnoman, MRO in Chestertown, who conducted the training along with Aydelotte, said the loader was already in use in the Chestertown district. "We are very impressed with the efficiency of this equipment," he said. "We could have spent hours trying to reach one pole in a marshy area, but we pulled six poles in about 30 minutes with the track loader. This is not just storm conditions, we are finding lots of uses for it, especially in low-lying areas."

"Our workforce really picked up handling the equipment quickly and they were setting 45 foot poles with ease at the end of the day," Aydelotte said.
