ATTACHMENTS EZ-0012 ROCK & ROOT PICK

KEY FEATURES

- Attaches to skid steers or any other machine equipped with the Universal Quick Tach' mounting system.
- Rotates 127 degrees to the operators left when attached to an EZ Spot UR Double Rotating Base.
- Can also be attached to an EZ Spot UR Non-Rotating Base.
- Serrated and pointed blade makes it ideal for uprooting trees and rocks, trenching and digging through hard soil and frost.
- Composed of Grade 80 material and core welded to withstand years of wear and tear.

EQUIPMENT SPECIFICATION

- 89 lbs attachment weight.
- 48 inch shaft length
- Comes complete with flush faced couplers and spring hose mount.
- Can be adapted to fit mini-excavators, wheel loaders, telehandlers and backhoes.

PRODUCT DESCRIPTION AND APPLICATIONS

The EZ Spot UR Rock and Root Pick is an ideal attachment for landscapers, trenchers, farmers and ranchers who need a versatile tool for digging. The Rock and Root Pick allows the operator to quickly and easily dig out rock and tree roots, dig trenches and break up hard and frozen ground. When attached to an EZ Spot UR Double Rotating Base the attachment will rotate 127 degrees to the operators left allowing you to get into hard to reach places. The one-man operation allows you to get the job done faster while keeping the operator safe and comfortable in the cab of the machine.

The EZ Spot UR Rock and Root Pick is designed to tear through hard ground to uproot rocks, roots and other material under the ground. The 48 inch shaft allows the operator to work at a safe distance in front of him to prevent injury or damage to the machine. The Rock and Root Pick gives you more versatility than its name implies. Put it to work for yourself today and do more work than you ever thought possible.
