ATTACHMENTS EZ-0013 SPEED BAGGER

KEY FEATURES

Attaches to skid steers or any other machine equipped with the Universal Quick Tach' mounting system.

Stand-alone unit that does not rotate.

Two powerful augers dispense sand through two chutes allowing two bags to be filled at the same time.

One 3"x6" hydraulic clamp cylinder opens and closes the attachment to quickly and easily scoop sand into the attachment.

600 lbs. attachment weight.

A crew of 4 men can fill 1000+ bags in just four hours.

EQUIPMENT SPECIFICATION

Two 7 1/2 inch flight augers push through sand and any material up to four inches in diameter.

Augers are enabled only when the lid is closed engaging the sequencing valve.

Conversion nozzle can be purchased to make it a single chute unit.

Equipped with a safety stand to prevent the attachment from falling on to your crew in case of accidental lowering by the operator.

Comes standard with flush faced couplers and spring hose mount.

Can be adapted to fit a mini-excavator, wheel loader, telehandler and backhoes.

PRODUCT DESCRIPTION AND APPLICATIONS

No more shovels and no more back-breaking work. The EZ Spot UR SpeedBagger makes it pain-free to fill sand bags. With just a crew of four men the EZ Spot UR SpeedBagger allows you to fill up to 1000 sand bags in just four hours! Easily fill sand bags on site right where you need them!

The EZ Spot UR SpeedBagger is the ultimate tool to fill sand bags for flood protection and other uses. The SpeedBagger utilizes a crew of just four people to do the same job that a much larger crew does with shovels and back-breaking labor! With two augers that push the sand through without clogging and amazing functionality you will be able to fill sandbags faster than you ever thought possible with the EZ Spot UR SpeedBagger!
