KEY FEATURES

Attaches to skid steers or any other machine equipped with the Universal Quick Tach' mounting system.

Extracts poles up to 100 feet in length with one man operation.

2,600 lbs. attachment weight.

Jaws open from 31 inches down to 2.81 inches.

Can extract poles up to 10,000 lbs and 100 feet.

Stand-alone unit that employs 4 clamp cylinders to grab the pole and one large hydraulic cylinder to extract the pole.

Composed of Grade 80 material or higher and core welded to withstand years of wear and tear.

EQUIPMENT SPECIFICATION

The pole is held securely by four 3"x 6" clamp cylinders.

The pole is extracted using a massive 7"x 36" hydraulic cylinder.

Comes complete with flush face coupler, spring hose mount, and wiring harness..

Can be adapted to fit excavators, wheel loaders, telehandlers, and backhoes.

PRODUCT DESCRIPTION AND APPLICATIONS

The EZ Spot UR Double Clamp Pole Jack is designed to pull utility poles up to 100 feet in length in all terrain including hard and frozen ground with foam and cleats. The Double Clamp Pole Jack is the ideal tool to pull transmission poles from the ground in minutes. The Double Clamp Pole Jack allows an operator to safely and easily extract a utility pole from the ground while keeping the operator safe and comfortable inside the cab of the machine.
