FULL-STACK AI ENGINEER

Candidate Reference Number: 202608131315

PROFILE

Full-Stack Engineer with approximately **3 years of production experience** building and shipping scalable SaaS applications. Strong foundation in **React, Next.js, TypeScript, Python, Django REST Framework, PostgreSQL, API integration, automated testing, and CI/CD**. Resume reports delivery of **30+ production web applications**, disciplined code-review practices, and end-to-end ownership from design review through deployment.

CORE CAPABILITIES

Frontend: React | Next.js | Astro | TypeScript | JavaScript | CSS | responsive design | component architecture
Backend / APIs: Python | Django REST Framework | REST API design | third-party API integration | authentication and authorization
Data: PostgreSQL | MySQL | data modeling | query optimization | database administration
Testing / Quality: unittest | pytest | integration testing | automated test coverage | code review | ESLint | Prettier | Black | Pylint
DevOps / Delivery: GitHub Actions | CI/CD | Heroku | Vercel | Docker fundamentals | environment configuration | Git/GitHub

SELECTED DELIVERY EVIDENCE

- Architected and deployed **30+ production-grade SaaS applications**; resume reports workloads serving 10K-20K concurrent requests/second.
- Implemented a backend testing strategy reporting **100% code coverage** with GitHub Actions gating pull-request merges and a reported 45% reduction in production bugs.
- Established automated quality workflows using **ESLint, Prettier, Black Formatter, and Pylint** across a 6-7 developer team.
- Led pull-request review for 5+ team members, providing architectural recommendations and supporting knowledge sharing.
- Created reusable SaaS modules that reportedly reduced project setup time from weeks to days and accelerated delivery by 40%.
- Integrated Salesforce and InstantWin APIs using **OAuth, webhooks, and real-time data synchronization**.

ENGAGEMENT FIT

Good fit for the **full-stack application layer of AI-enabled products**, particularly frontend, API, database, testing, and delivery work. The supplied resume does **not document direct LLM, RAG, agentic workflow, or model-integration experience**, so those capabilities should be validated separately before positioning the candidate for AI-core ownership.

EXPERIENCE EVIDENCE

2024-2026 | Full-Stack Development: Built and deployed SaaS applications with React, Django REST Framework, PostgreSQL, testing automation, CI/CD, third-party integrations, and Agile delivery.
2023-2024 | Software Development Internship: Built a React/Django administrative and broadcast-support system, participated in specification workshops, validated integrations, and collaborated through GitLab workflows.

EDUCATION

Bachelor's Degree in Computer Engineering
