Called “a master facilitator” by his clients, Dan is skilled at building strong teams, developing innovative solutions, and insightful analysis. As a motivational speaker, he uses enthusiasm and humor to drive home key concepts and affect change in his audience. As a coach, he brings focus and results to leaders, managers, teams and organizations.

Not education, experience, knowledge nor intellectual horsepower. None of these serve as an adequate predictor as to why one person succeeds and another doesn't. There's something else going on that society doesn't seem to account for. We see examples of this in our day-to-day work places, homes, churches, schools and neighborhoods. We observe supposedly brilliant and well-educated people struggle, while others with fewer obvious skills or attributes flourish. Why? The answer almost always has to do with **emotional intelligence**. And while it is harder to identify and measure than IQ or experience, and certainly difficult to capture on resumes, its power cannot be denied. - **“This workshop experience will change you and your team for good.” - Dan McGraw**
