

The Specialty Center Fairview project is moving toward the finish line!

We recently reached a major milestone with the Certificate of Occupancy and are now preparing the space for its first patients.

SPMT Group is proud to have supported by providing Project Management Services for this new 28,000-square-foot clinic alongside our trusted design-build partner, The Beck Group and equipment planning services partner HSG Inc..

We look forward to seeing the positive impact this facility will have on the community.

Big news for families in Collin and Denton Counties! 🎈

As part of our commitment to provide specialized care close to home for the region's rapidly increasing pediatric population, Children's Health will open Children's Health Specialty Center Fairview later this year.

This new 28,000-square-foot space will expand care for children and families in North Texas. Opening first this September within the Fairview center: our fourth Children's Health Andrews Institute location, delivering advanced sports medicine care.

Stay tuned for more information!
