MISSION
CRITICAL -
PROJECT
MANAGER

SPMT GROUP WELCOMES DANIEL DE LA CRUZ AS MISSION CRITICAL PROJECT MANAGER

SPMT Group is excited to welcome **Daniel de la Cruz** as a **Project Manager**, bringing more than a decade of construction industry experience and specialized expertise in low-voltage network infrastructure. With a background that blends practical construction knowledge, technical coordination, and business leadership, Daniel is well-positioned to support complex, fast-moving projects on behalf of SPMT Group's clients.

Daniel's career has included work across a diverse range of highly regulated and technically demanding sectors, including **healthcare, national defense, commercial retail, and cryptocurrency data centers**. His experience has given him a strong understanding of how to coordinate project teams, manage technical requirements, and support critical infrastructure work where communication, accuracy, and attention to detail are essential.

In his role with SPMT Group, Daniel will be focused on **Mission Critical project work** for a **major hyperscale client in South Dallas**. His background in construction and network infrastructure will allow him to support project coordination, documentation, field communication, and alignment between owners, design teams, contractors, vendors, and trade partners. His ability to understand both the construction process and the technical systems that support modern facilities makes him a strong addition to SPMT's growing Mission Critical team.

Prior to joining SPMT Group, Daniel built a career centered around construction execution, technical infrastructure, and project leadership. His entrepreneurial background and experience managing complex work across multiple market sectors have helped shape a practical, solutions-focused approach to project management.

Daniel holds a **Bachelor of Science in Business Administration from Southern Oregon University**. His combination of business acumen, construction experience, and technical knowledge brings valuable perspective to the projects and clients he will support.

Daniel currently resides in **Dallas, TX**, and brings to SPMT Group a strong work ethic, a team-first mindset, and a commitment to helping deliver projects that support critical operations and long-term client success.

Please join us in welcoming Daniel to the SPMT team!
