**Dear Parents**

**Re: 7+ Maths Annual Course – 2026 (for 2027 Entry)**

For 7+ Maths preparation for **2027 entry** (King's, St Paul's, Westminster, and girls' schools such as LEH and Bute House), I follow the **KS1 National Curriculum**, moving slightly ahead to cover topics children may not yet have encountered. Lessons focus on **number, reasoning, and problem solving**, building confidence with different question styles.

**Exam Formats**

- **King's College School:** three 10-minute sections – Number Work, Mathematical Reasoning, Investigation / Problem Solving.
- **St Paul's Juniors:** 35-minute Mental and Written Maths, focusing on mental maths, speed, and accuracy.
- **Westminster:** problem-solving and arithmetic; checks understanding, logical thinking, and the ability to apply maths to new problems.
- **Girls' schools (LEH, Bute House):** arithmetic, problem solving, reasoning, and times tables; some sections may be online.

Throughout the year, progress is closely monitored, and lessons are adapted to support each child. The goal is for pupils to **enjoy Maths, build confidence, and be well prepared** for their target school exams.

**Warm regards,**

**Ben**
