Wooden Dice

Make a statement at your game table by rolling these fantastic wood dice. Carefully carved from individually selected pieces of domestic and exotic woods, these hand finished sets are beautiful, unique pieces of art.

We do not stain or paint any of our dice. Instead, they are hand finished with an oil (to pull out the wood's natural grain patterns and colors) mixed with a small amount of poly to provide a thin protective coating while keeping the natural beauty of the wood.

Our dice sets contain a kite shaped d4 and the option to choose between the standard d6 and d12 or a rhombus d6 and d12.

Each set comes with its own black velvet bag and, if that wasn't enough, plants a tree.*

The wood die or dice shown in the images are meant to be representative of the traits to that species of wood. Every piece of wood that these dice are carved from is different and therefore the resulting dice will vary. The product purchased will be of that species of wood, but may vary due to this.
