

Capability Statement 2018

Company Overview

Nextep Miyama Group commenced operations in the year 2000 and has since developed into a leading manufacturer of potable water dedicated fibre reinforced plastic (FRP) and HDPE products providing custom access infrastructure for the water industry.

Our company provides a range of services to the water industry including equipment design, project management, in-house manufacturing and maintenance.

Projects are undertaken in all states of Australia and a number of international countries.

Nextep Miyama Group employs over 25 full time people and has successfully completed a number of projects & custom onsite renovations to service many market sectors predominately leading water authorities and construction companies throughout Australia.

The Head Office located in Windsor, NSW incorporating manufacturing facilities and a substantial capacity for storage and loading/ unloading of equipment for transportation.

From inception, Nextep Miyama sought to develop high quality market leading technologies better suited to the relatively severe Australian conditions.

We have invested on research and development of designs that have been refined using input from our workshop, field installation crews, operations staff and feed back from clients to ensure the production of reliable and robust equipment.

Together with leading technologies sourced both locally and internationally, this has now become the most comprehensive range of potable water designed infrastructure products available in Australia designed and tested to standards AS4020 & AS1657.

We offer complete capability in manufacturing & delivery of a full range of infrastructure for potable water assets such as reservoirs, treatment plants and pumping stations.

We have the ability to design, fabricate, install, commission and maintain our entire range of products. This allows us to be a “one-stop-shop” for both industrial and municipal clients, reducing the number of interfaces as well as offering practical and cost effective overall solutions.

Products

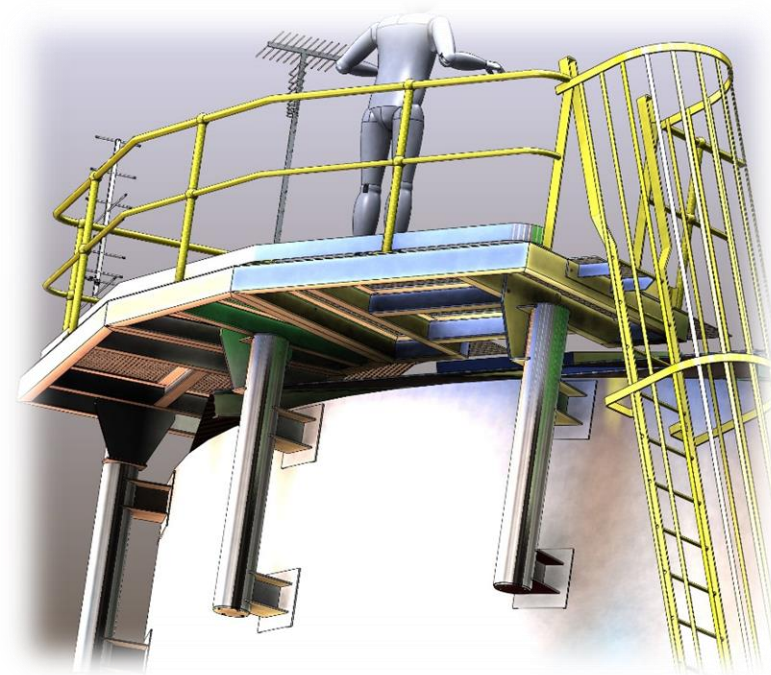

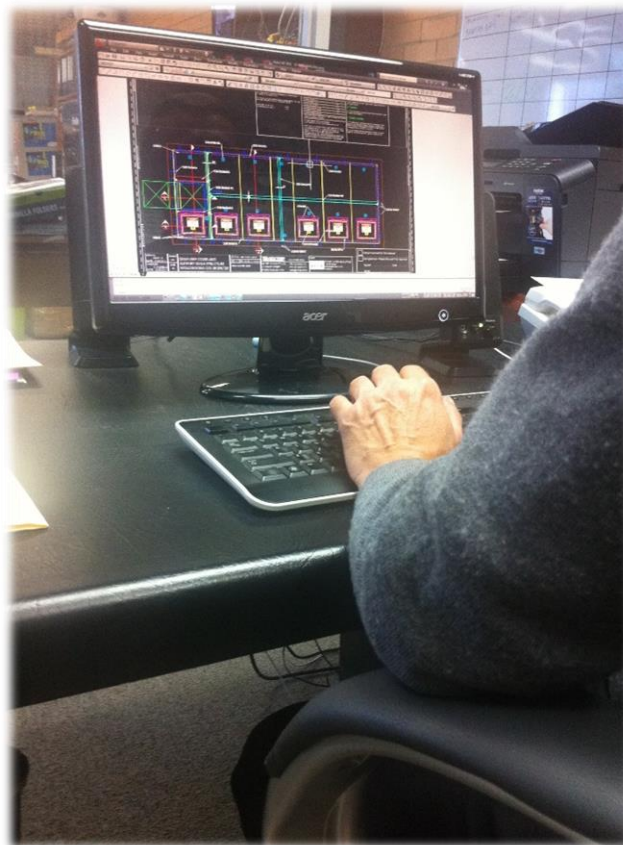

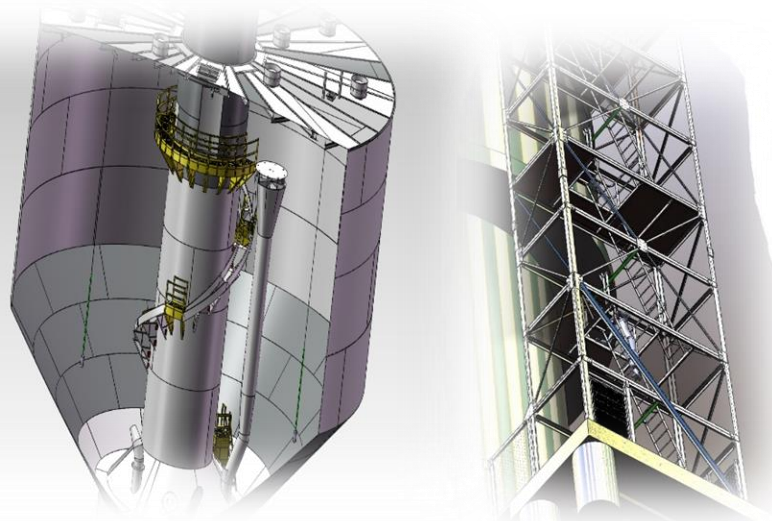

High quality materials of Fibre Reinforced Plastic (FRP) and High-Density Polyethylene (HDPE), incorporating corrosion resistant materials sourced from reputable raw material suppliers manufacture Nextep's revolutionary product range.

- FRP Vertical Ladders and Ladder Safety Cages
- FRP Platform Arrangements
- FRP Grating and Handrails
- FRP Access Covers
- HDPE Directional Nozzles and Outlet Screens
- HDPE Overflow Pipes
- HDPE Chlorine Dosing Baskets and Sleeves
- HDPE roof profile vermin proofing
- Polypropylene Coated Step Irons

Nextep provides comprehensive certified engineering structural design and drafting

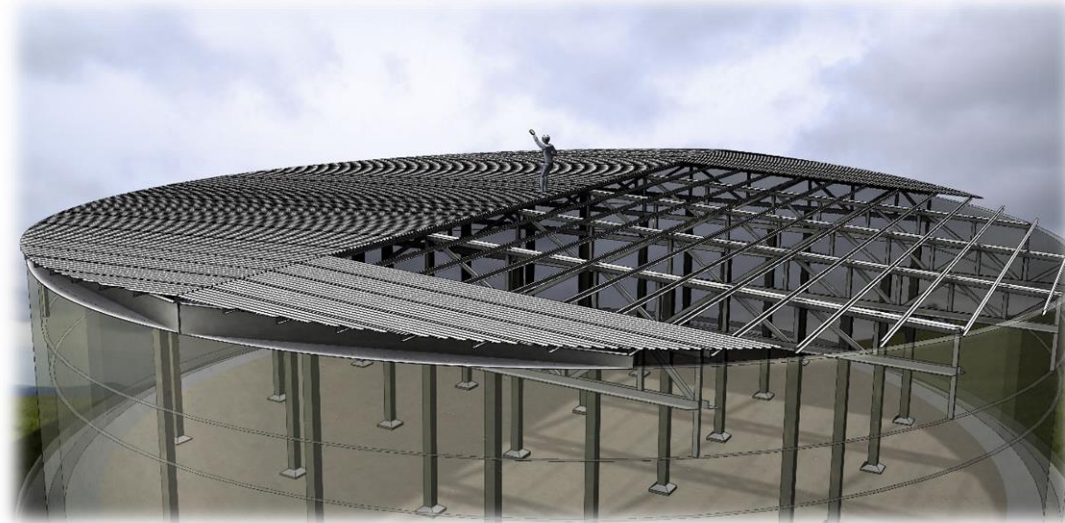

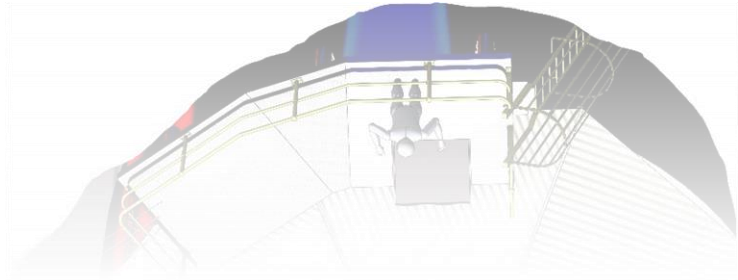

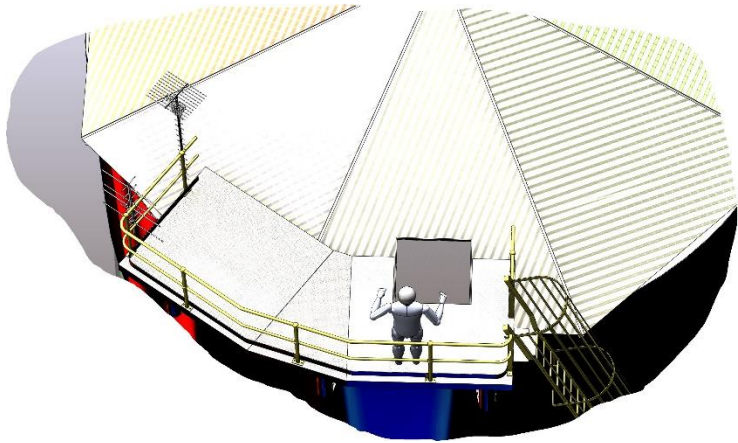

Design capabilities

- In House Engineering
- External RPEQ certification
- 3D Modelling
- CAD drawing
- Solid Works

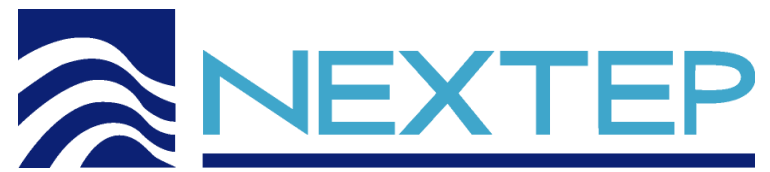

Custom Designs

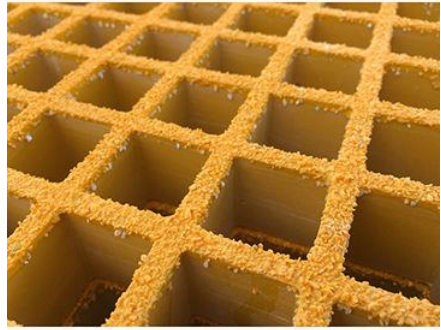

NEXTEP

Manufacturing

“Complex and custom solutions to meet client specifications through proven manufacturing capabilities”

Installation

Through diversified training, acquiring specialised personnel and equipment, Nextstep take great pride in offering clients onsite installation on various projects

Services of :

- Confined Space
- Working at Heights
- In House crane & rigging & services
- Working over water
- Elevated Work Platform
- Abseiling
