

Activate Your Body's Innate Intelligence

Everyone benefits from more oxygen in their body but especially those who are suffering from disease or injury.

HEAL - REGENERATE - DETOXYFY

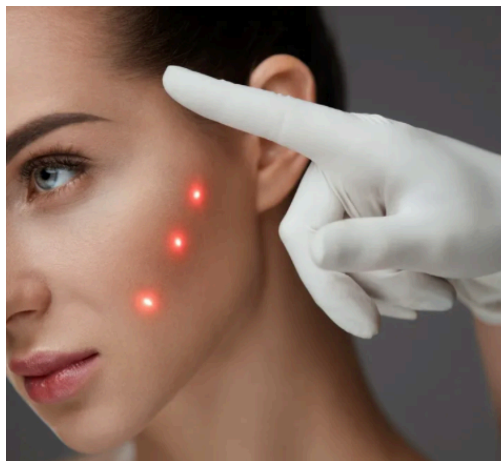

In a hyperbaric oxygen therapy chamber, the air pressure is increased two to three times higher than normal air pressure. Under these conditions your lungs can gather much more oxygen than would be possible breathing pure oxygen at normal air pressure. When your blood carries this extra oxygen throughout your body, this helps fight bacteria and stimulate the release of substances called growth factors and stem cells, which promote healing. Other conditions treated with hyperbaric oxygen therapy include serious infections, bubbles of air in your blood vessels, and wounds that may not heal as a result of diabetes or radiation injury.

SPORT & PERFORMANCE

Professional Sports & High Endurance Athletes experience better and faster recovery from surgery lesion with high performance and clarity during competition. HBOT is more than rapid healing from sports injuries it is also enhances energy and clarity while competing. In studies review, HBOT showed particular promise for sports injuries involving areas of a muscle that have lower blood flow.

COSMENTIC SURGURY

HBOT anti-aging protocols help to reduce swelling and discomfort while providing your body with at least 10 to 15 times its normal supply of oxygen. Because of this, is why many doctors recommend HBOT to help cosmetic surgery patients recover faster after and help with anti-aging. Hyperbaric oxygen therapy works to safely speed up the body's recovery time by up to 75% after surgery.

CHRONIC DISEASE

Treating critically ill patients with hyperbaric oxygen requires specialized equipment and personnel with intensive care unit skills and knowledge of the physiology and risks unique to HBOT. Heart disease, cancer, and diabetes among a few are the leading causes of death and disability. Chronic pain is described as pain that persists well past the usual course of disease or injury.
