

Research suggests that HBOT (Hyperbaric Oxygen Therapy) has the potential to improve the clinical outcome from within just 1 to 3 therapy sessions, experts and evidence recommend Hyperbaric Oxygen Therapy to be taken at least a minimum of 10 sessions to promote and optimize the benefits contributed from a higher concentration of oxygen saturation in the patients blood and tissues.

It is at this time that I _____ decline the recommended minimum 10 session treatment. I acknowledge and understand what has been stated to me not only in this document but by the recommended HIPERBARICA VALLARTA Protocol which has been prescribed for me.
