

Ready to unlock the true potential of SAP
DM? Kickstart your journey with our Smart
Start POV!

SAP® DM

Hackaback Technologies

Empowering a connected future through innovative technology for all

For Executive Management

Data-driven decision making with sustainable data.

For Manufacturing Enterprises

Intelligent smart factory with sustainability in every single part of the supply chain

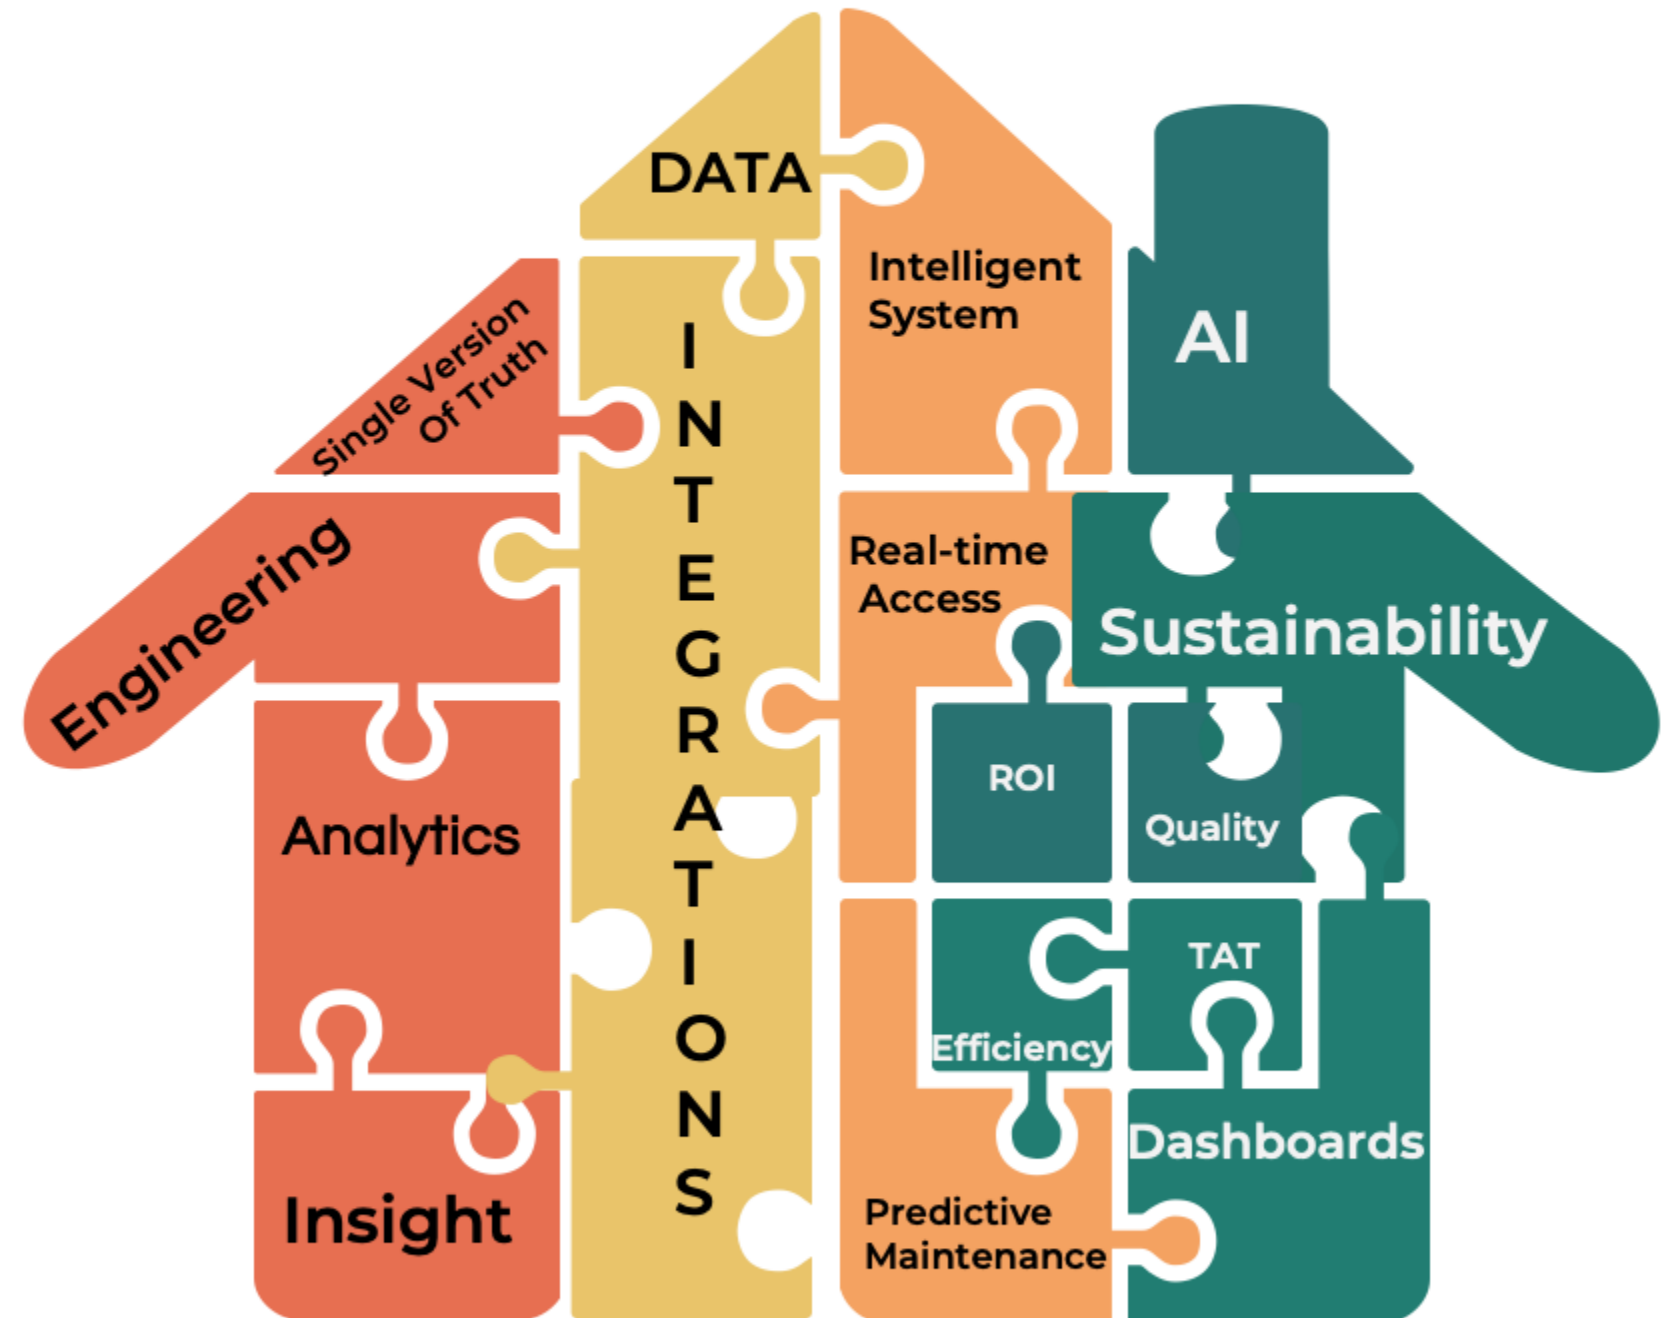

For Frontline Workers

Easy usage of data for efficient working procedures with real-time data access.

For Everyone

Unified data platforms that allow for immediate cross-departmental insights and actions, empowered by SAP's integration capabilities.

“

Industry 4.0 is not just about machines getting smarter, but about forging a new era where human creativity converges with technological prowess.

What we do?

SMART POV

Elevate a single factory line with SAP DM Execution and Insight, harnessing data-driven excellence for optimized production.

REO

We offer a streamlined, one-line solution, ensuring harmonious coordination for maximum efficiency.

Value Add

Unlock unparalleled insights with our Factory Performance Analysis using SAP DM. We turn data into decisions, optimizing every corner of your manufacturing floor.

Proof of Value Service

Experience precision with a Digital Twin tailored for your line(s), bridging the virtual and real for unparalleled insights.

As Is

We meticulously capture the current state of your processes, paving the way for informed decisions and transformative journeys.

Blueprinting

We map out intricate details, ensuring every aspect of your vision is captured and ready for execution
