

The Beacon

Published semi-monthly by Safe Harbor Broadcasting, Homer, Alaska June, 2019

The brains of the outfit..and it's not the guy on the left.

Hourly Newcasts Added.

Weekday mornings from 7 to 9, we help get you Up & At 'Em. Local weather, the Marine forecast, even the Homer Kachemak Bay tides are included. We just signed on with USA Radio News for an hourly newscast. That's a prayer answered.

We have also added The Gaither Homecoming Radio Hour every Saturday evening and Thursday evening at 8:00. Of note is that Safe Harbor Broadcasting was mentioned on the recent airing of 20, the Countdown Magazine, the weekly Adult Contemporary Countdown program. To round out our new program lineup is Backhome Gospel Classics with host, Dave Oseland. That 'old timey' Gospel show airs Sunday and Tuesday at 8:00 p.m.

If you get a chance, tune in on-line and give us a listen. We have added a Bluetooth receiver to our home

stereo and Candace and I have really been enjoying the music in full fidelity stereo. We've even been known to crank it up on weekends!

The Broadcast Startup Costs

\$70,000 construction goal	
<u>Transmitter & Antenna</u> \$50,000	
<u>Frequency Search</u> \$5,000

All licenses have been paid to allow legal streaming of all Christian music titles and artists. Thanks to so many who have helped make this possible. Our next hurdle has been to find a music scheduling software package to allow faster and more frequent updates to our programming. There was concern when the price-tag for

MusicMaster Pro, the system we hoped to use, was \$1,000. That seemed out of our reach. Yet, we never gave up on the promise of the Holy Spirit. This allowed us, with a single email, to reach an agreement for a fee of only \$25 a month. And, this is for the fully supported Pro system, which not-coincidentally, is the same system used by the station in Nome. God always provides.

Then, we experienced the next big answer to our daily prayers. The new Manager in Nome, sent us the complete backup of the KICY-FM library as an e-mail attachment. We loaded it...and voila! A fully operational music scheduling system. Praise God for His many mercies.

We are seeking a local Windows Network Administrator. There are three functions which still need direct access to our local LAN.

This will make our life a lot easier!
