

Worldwide Leader in Metering Products, Systems and Services

Water utilities worldwide today rely on Itron's proven Water Metering Systems for all applications in the Residential, Commercial and Industrial markets.

By combining Itron's accurate and reliable metering products and systems with Itron's industry-leading AMR/AMI and software expertise, we can provide the technology you need for the best in Water Management Solutions.

> **Residential Singlejet Water Meter**

- > Class B Singlejet Water Meter for Residential Applications
- > ISO 4064 compliant
- > Available in sizes DN 15-20mm
- > Plastic rotatable extra dry register
- > Pre-equipped option for communication
- > Direct magnetic transmission
- > IS: 779: 1994 approved

> **Multijet velocity Type Water Meter**

- > An EEC approved / ISO 4064 compliant Class B Multijet velocity type water meter
- > Available in sizes DN 15 and 20
- > Proven reliability of the extra dry register
- > No parts of the register are in contact with the water passing through the meter
- > Pre-equipped for communication
- > Easy reading with rotation close to 360° on site
- > Option for plastic / copper register
- > Option for IP68 protection class register

> **Handheld solution for Mobile Meter Reaing**

- > Handheld Solution for Mobile Meter Reading
- > The solution uses Itron EasyRoute software to optimize radio reading
- > Uploading / Downloading routes from/to the host computer
- > Programming of all Itron radio meter modules
- > Fast group reading via polling mode
- > Graphical display of all enhanced data such as fixed date readings, leakage & backflow data, alarms, consumption profile
- > Rated at IP65, protected against dust & water sprayed from all directions

> **Residential, Industrial and Commercial Multijet Water Meter**

- > Class B Multijet Water Meter for Residential, Industrial and Commercial Applications
- > Available in sizes DN 15 to 50mm
- > EEC approved / ISO 4064 compliant
- > IS: 779: 1994 approved
- > Plastic rotatable extra dry register typical of multi-jet technology, with the long-term reliability
- > Class B in horizontal position body in brass painted reliability
- > Pre-equipped for communication
- > Direct magnetic transmission

> **Woltman Meter for Water Distribution**

- > EEC approved / ISO 4064 compliant Horizontal Woltman Meter for Water Distribution Applications
- > Available in sizes DN 50 to 500mm
- > Hermetically sealed register (copper can/mineral glass envelope)
- > High flow-rates enduring capacities
- > Wire sealed metallic cap equipped with lockable lid is available as an option for harsh environment
- > Interchangeable approved mechanisms without recalibration
- > Pre-equipped through Cyble as a standard

> **Radio Module for Remote Water Meter Reading**

- > Radio Module for Remote Water Meter Reading
- > Compatible with all Itron pre-equipped Water Meters from DN 15 to 500mm
- > Monthly index records spanning 13 months
- > Leakage and Backflow Detections
- > Tampering alarms
- > RADIANT technology offered gives the best radio communication even in congested areas

Itron
