- Huge Variety of Models in Multiple Configurations for the majority of Applications
- One of the most User Friendly and Easy to operate by a multiple of Construction Trades
- Available in Lithium Battery, Gasoline or Diesel on some Models to accommodate all environments

Add Ons

- **TC100G/BT 180 Swivel**
Hydraulically swiveling 180° trilateral unloading dumper body. Rotation blocking valve. Its round shapes are particularly suitable for the handling of aggregates, earth and other waste materials.
- **TC100G/MT-MTP *Self-Loading***
Loading body with small front door with automatic opening/locking, which can be easily removed. Its round shapes are particularly suitable for the handling of aggregates, earth and other waste materials. The loading shovel, assembled on the body, permits any maneuver in full security and the complete filling of the body.
- **TC100G/AVP Hi-Tip Skip**
High tip dumping body with scissor lift system. The tipping height of 6'2" permits to unload also in large containers and trucks.
