

Live Well & Prosper

A COMPLIMENTARY WELLNESS SERIES
5-6 P.M. | SONORAN

BETTER EARLY, THAN LATE *The Critical Importance of Early Detection* **TUESDAY, FEBRUARY 25**

Discover the critical importance of early detection. Gain insights from leading expert Dr. Michelle Anderson, consultant in the Department of Gastroenterology and Hepatology at Mayo Clinic, as she delves into the science behind early detection and shares her expertise on the latest breakthroughs in pancreatic cancer research, including novel biomarkers and advanced screening methods. You'll also hear an inspiring story from Desert Mountain Member Connie Harrington, who will share her personal pancreatic cancer journey. This event is proudly sponsored by Desert Mountain CARE and Mayo Clinic.

Michelle A. Anderson, M.D., MSc, FASGE — is a consultant in the Department of Gastroenterology and Hepatology at Mayo Clinic in Arizona. She holds a B.S. degree and an M.D. degree from Wayne State University and completed medical residency training and a fellowship at the University of Michigan Medical Center (UMMC). During her tenure at UMMC, she held multiple leadership roles and had a distinguished career in patient care and innovative research. She is nationally recognized for her expertise in clinical and translational pancreatology and has led NCI-funded research in pancreatic cancer biomarkers for early detection.

PRE-REGISTRATION IS REQUIRED FOR ALL PROGRAMS. CONTACT OUR CONCIERGE AT 480-488-1363 OR BOOK ONLINE.
