# TELECOM PROJECT SUPPORT

We excel in meeting telecom companies' wireline network project needs. Our services include equipment and cable installation, splicing, testing, and provisioning, with a focus on headends, central offices, data centers, and enterprise client sites. Our expertise ensures reliable, high-performance telecom infrastructure.

## COMMERCIAL NETWORK SOLUTIONS

We support commercial clients with communication and data networks through equipment and cable installation, testing, and provisioning. Our solutions enhance internal infrastructure, delivering dependable connectivity within your facilities.

## NETWORK INFRASTRUCTURE SUPPORT

- **Backbone & Cabling:** Expert design and implementation of internal backbone systems and structured cabling.
- **Wireless Systems:** Installation of wireless access points, extenders, and interactive display screens.
- **Communication Systems:** Setup and maintenance of phone, security, monitoring, and point of sale systems.
- **Power & Infrastructure:** DC power systems, solar equipment, conduit, rack/cabinet installations, cable trays, and fiber troughing.

**Coverage:** Technicians situated throughout the GTA and the downtown core, West to Kitchener, East to Oshawa, and North to Barrie and Collingwood. But with a greater deployment area covering all of Southern Ontario.
