VISUALIZATION

IS THE PULSE OF YOUR FACTORY

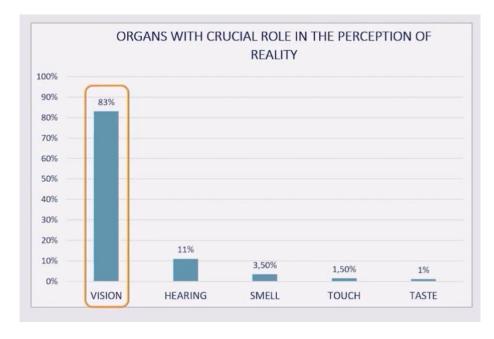

VISUAL WORKPLACE

WHAT?

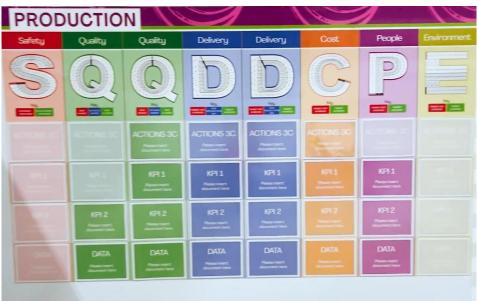

A picture or chart is worth more than a thousand words.

In Lean manufacturing (Toyota Production System), time consumed in transfer of information or data is also treated as waste.

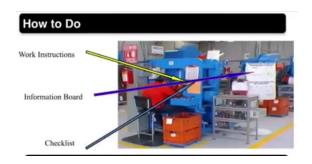

Visual workplace or Visual Management is a medium of conveying data and information in a most efficient manner.

BENEFITS:

- 1) Simplified and clear instructions.
- 2) Enhances workplace safety.
- 3) Easy to understand and reduction of errors.
- 4) Improve productivity and output
- 5) Increased profits.

I am visiting and seeing the process in the manufacturing and service organizations for the past 46 years, to my knowledge, we can display and use more than 100 VISUALS in the daily work to avoid TIME WASTE and make our job more enjoyable.

****DISPLAY VISUALS AND REACH YOUR DAILY TARGET ON TIME *****

Dr. R. BALAKRISHNAN

CONSULTANT – Japanese Management Practices
