Sunshine Residential Homes – Review Manipulation Indicators

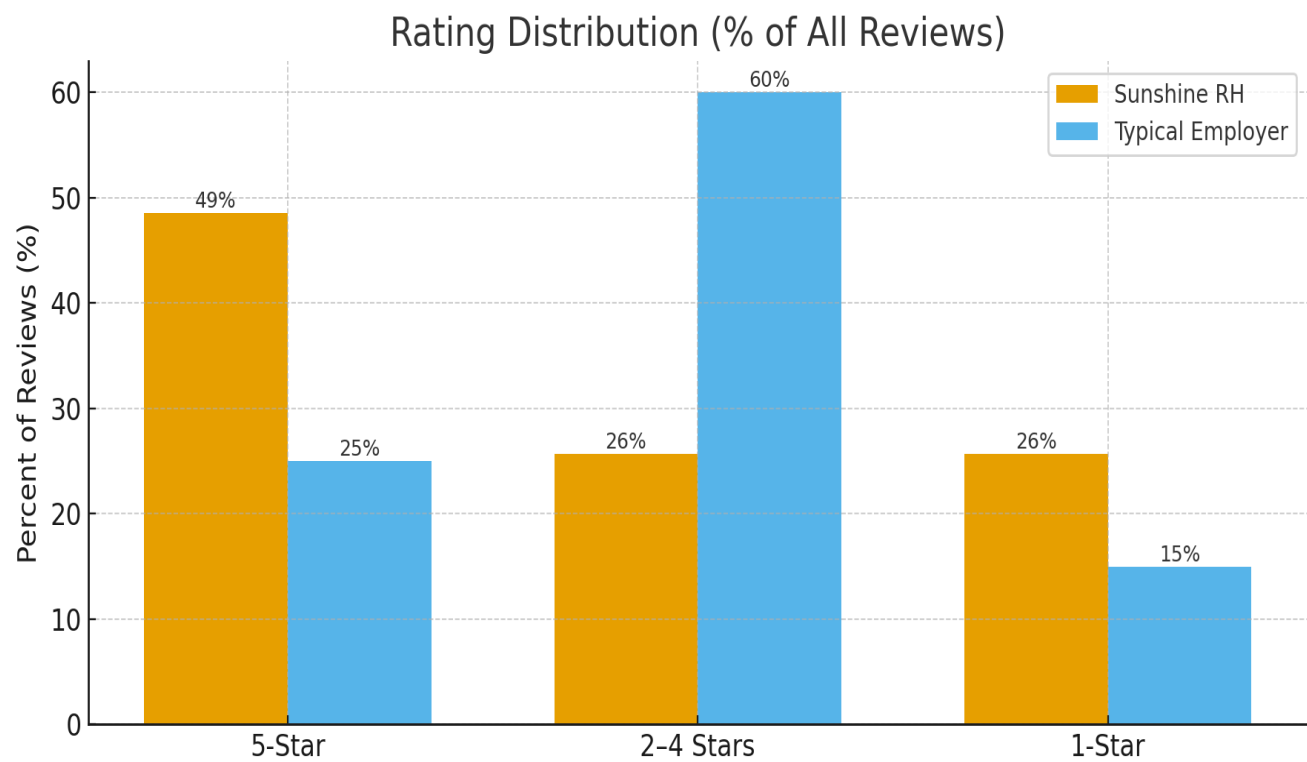

Summary: Our analysis of 70 Indeed reviews shows an estimated **32.9% suspicious review rate** at Sunshine Residential Homes, compared with a typical employer baseline of ~7.5%. The profile exhibits hallmark signs of reputation manipulation: recycled phrases, temporal clustering of 5-star posts, and an inflated share of perfect ratings.

Metric	Value
Total Reviews Analyzed	70
Estimated Suspicious Reviews	23 (~32.9%)
Typical Suspicious Rate	~7.5% (Indeed baseline)
5★ / 1★ / 2–4★ Split (SRH)	34/18/18 reviews

Suspicious Reviews Over Time (2012–2025)

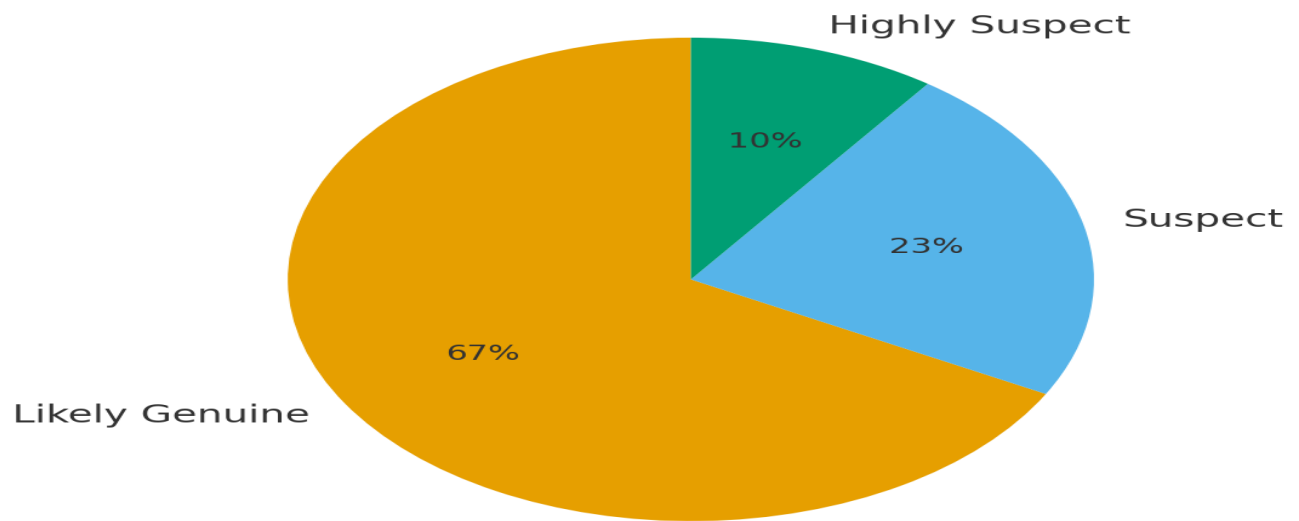

Rating Distribution: SRH vs Typical Employer

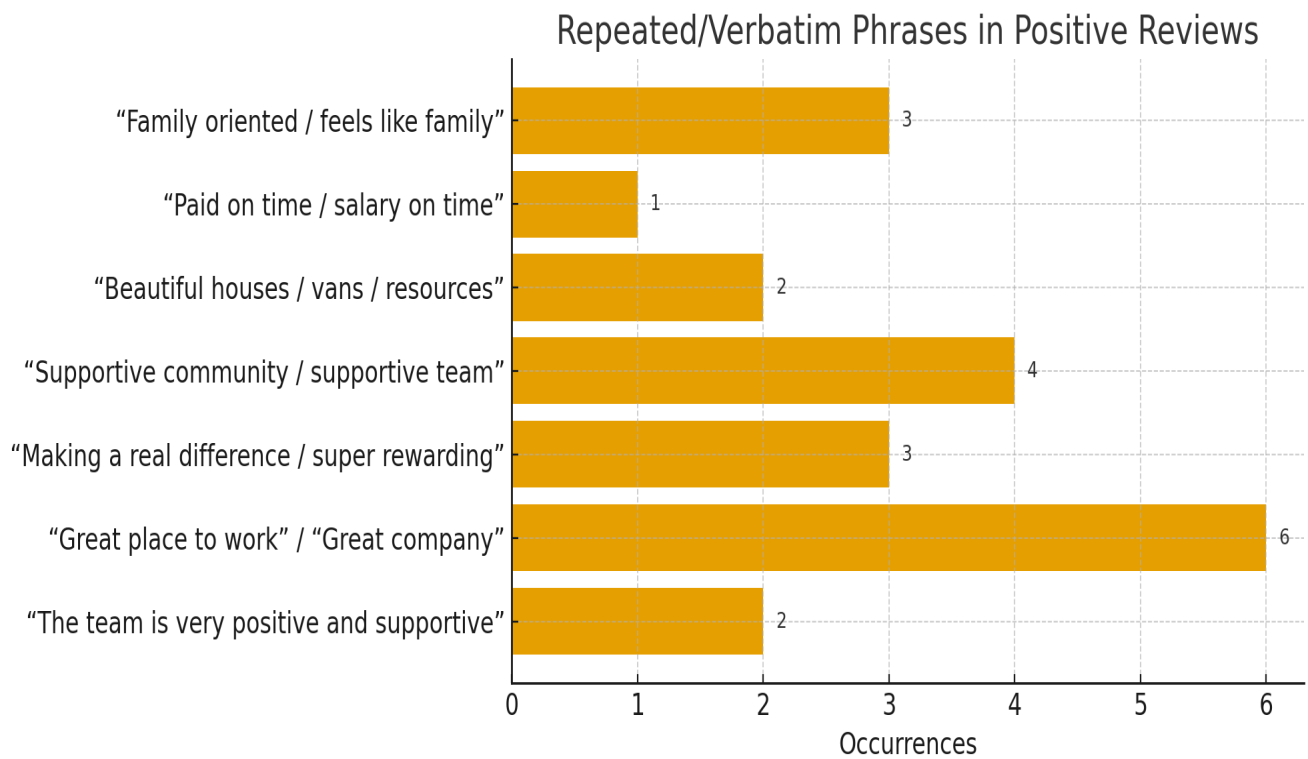

Estimated Authenticity Mix

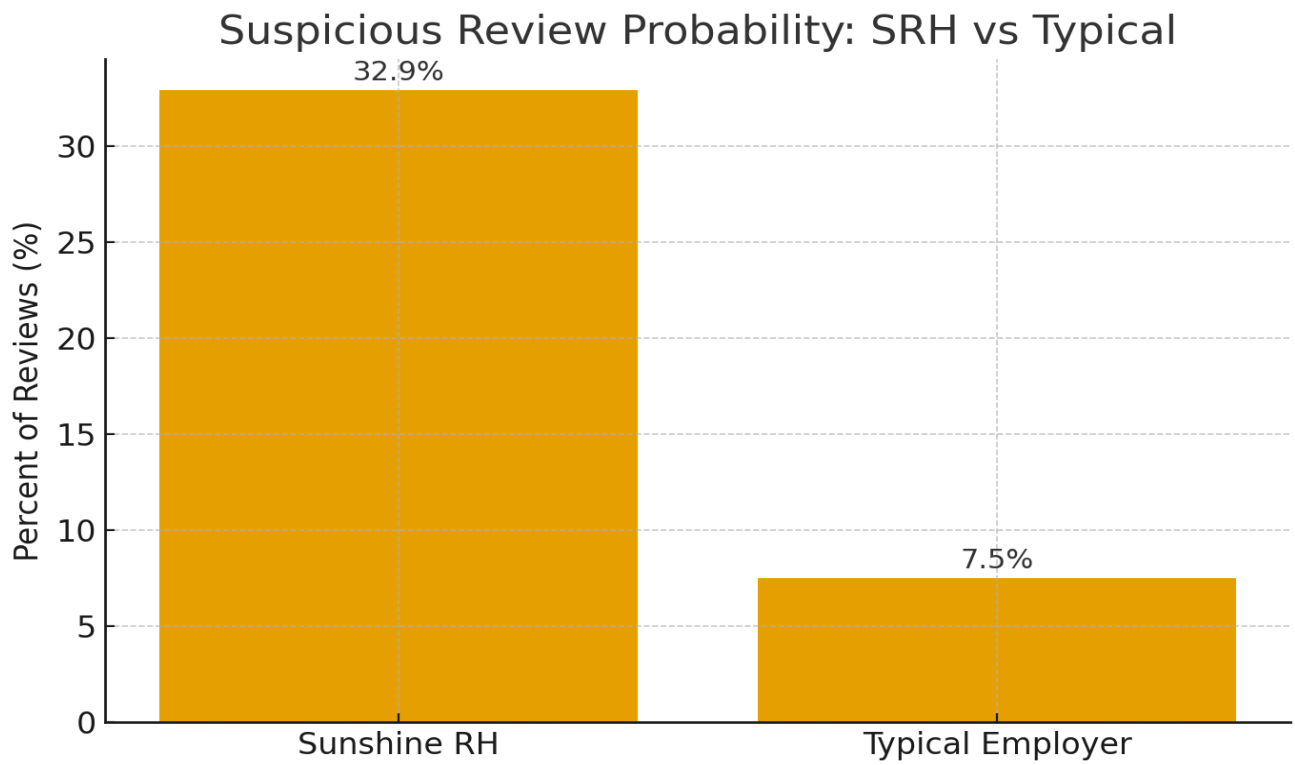

Estimated Review Authenticity Mix (n=70)

Repeated Phrases in Positive Reviews

Suspicious Review Probability: SRH vs Typical

Conclusion: The concentration of repetitive language and anomalous rating patterns, paired with a suspicious-rate more than 4× the typical employer baseline, constitutes strong evidence of systematic review manipulation.
