

5052 CUSTOM FAB LTD.

The Aluminum Truck Canopy

Half Back

Full Back

Full Floor

Our truck canopies are manufactured from our namesake 5052 grade, 1/8" thick aluminum and are made to order for your truck or fleet at our shop in Calgary. Because we don't keep any canopies in our inventory, you know that your item will be exactly what your business needs, no need to compromise. From adjustable shelving, to beacons and strobe lighting, to roll out Cargo Beds, we can build a unit or fleet you won't find anywhere else. Our canopies also come standard with bulb seal door rubber to keep your equipment and supply storage weather-proofed. Owner Darin Cates was one of the creators of the "Nortruck" style canopy, having made hundreds over his career with Nortruck. His knowledge and expertise now lives here at 5052 Custom Fab.

We can also manufacture tool sheds and service bodies.

Fleet discounts are available.

Half Back

A perfect entry-level unit, and our most popular style of truck canopy. These canopies are installed on truck bed rails to meet the tailgate. Units like these and our full back models are sometimes called truck toppers or truck caps and are a great truck accessory for your business.

Full Back

When you order a full-back truck canopy, we will remove the tailgate to your truck and will install the unit on the truck bed rails.

We build two barn doors to the canopy to seal and weatherproof the truck bed. Since these units sit on the truck rails, they are lighter than the full floor model.

Full Floor

This model is a complete shell installed on the bottom of the truck bed. Because the canopy is a complete unit, the sealing is even better than our other models. These units can also have a rolling Cargo Bed installed. This is the most popular "Nortruck style" truck canopy on the secondhand market.

Options

- Front and rear windows
- Shelves in side compartments
- Drawers in side compartments
- Roll out Cargo Bed
 - *Only available on full floor models*
- Roof racks
- Inside lighting
- Main and/or side compartments
- Strobe or arrowstick
- Rear and/or side facing work lights

We are an official Cargo Bed supplier, so you know we can get the best price for your unit.

ROLL YOUR WORLD INSIDE OUT™

Nothing about our canopies is standard and nearly every aspect can be fully customized to your needs. While these are the most common options selected for aluminum canopies and if your business or trade requires something not listed, please let us know.
