Measurement & Metrics Strategy

<u>Overview</u>

Everyone has read "Measure What Matters" but many still default to "measure what's easy". Our "Actions \rightarrow Outputs \rightarrow Outcomes" measurement philosophy eliminates the use of cluttered dashboards and vanity metrics, and ensures you are reporting the right measures at the right level of the organization with one purpose: to help guide strategic decision making. Key tenets of our approach, known as *n*-dicatorsTM, include:

- Ensure alignment against marketing objectives and minimize "nice to know" metrics
- Raw numbers without context have no meaning; Metrics are only the starting point for action
- Deliver only measures relevant to each management role, with ability to dive deeper as desired
- Simplicity; visualize where it helps to communicate the information in an impactful way

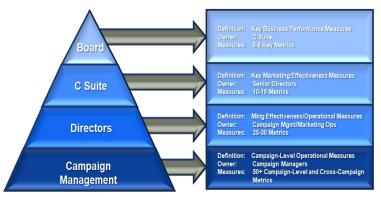

Measurable Outcomes

- Improved Return on Marketing Investment
- Increased engagement, response, retention and conversion rates
- Higher Customer LTV and loyalty measures, optimized CPA

Listed outcomes are representative only, and specific outcomes this Schema[™] will address may vary depending on your industry, target audience, and business goals.

Derived Benefits

- **Data-Driven Decision Making:** Make informed decisions based on clear and actionable metrics.
- Improved Marketing Efficiency: Optimize resource allocation and campaign performance.
- Enhanced Accountability: Understand marketing team performance and contribution to business goals.
- Stronger Cross-Functional Collaboration: Improve alignment between marketing and other departments.
- Increased Marketing Agility: Faster response to market changes and opportunities.

Foundational Approach

- 1. Define Key Outcomes/Goals/Objectives
- 2. Align on Measurement Philosophy/Marketing Effectiveness Definition
- 3. Inventory Potential KPIs by Management Level, Define Measurement Approach
- 4. Data Visualization & Reporting Design
- 5. Implementation & Ongoing Optimization
- 6. Integration with Marketing Technology
- 7. Performance Reviews & Iterative Improvements
