

## DICE BASEBALL GAME RULES

Both Players roll a die, and whoever rolls the highest number gets to pick to be the home or visiting team.

Player 1 will roll both dice. Add the two numbers together and use the board to determine the outcome. Place your player marker on the bases accordingly. (If you hit a double, place your marker at second base)

When there are runners on base, the runners can move around the bases according to the new batter's outcome.

Once a player makes 3 outs, then his turn is over, and the next player is up. Each player will get 3 outs before moving onto the next inning.

Play 9 innings to see who wins.
