

Golf dice game instructions

1. You can have 1-4 players
2. Pick someone to start the game and change turns in a clockwise rotation. All players roll once then pass the dice and count their strokes.
3. When teeing off if a player rolls an odd number they move their marker to the fairway. If its an even number they move to the green. NOTE Whenever a player is on the tee box or fairway, they will roll a separate die (8 sided dice included), they will call out a number. If that number comes up they just got a hole in one or made it in the cup from the fairway. You can also just use the 6 sided die for easier odds and only have to throw one dice
4. If in the fairway you still need a even number to make it to the green. If its odd you remain in fairway till next round and count your stroke. Don't forget to call out a number on the separate die to sink it in the hole.
5. When you are on the green you must roll a 1,2,3,or 4 to make it in the hole. If not, its the next players turn and you count your stroke and your marker remains on the green.
6. When you finish the hole move the marker in the scoring area ahead the number of strokes taken.
7. The first person to sink his putt starts the next round and continues to start till someone beats him on a hole..
8. If at the end of the game you have more then 40 strokes start over at 1 and add 40 to it at the end of the game.
9. Par is 27
