Using makeup is something we are taught to do.

But, we've been taught by the people who brainwashed our moms.

The Cosmetic Industry.

They count on the fact that even if cosmetics harm your skin, have toxic ingredients, and break your bankbook...

You'll use it.

It's hard to say no to looking as good as you can, and the cosmetic industry banks on that.

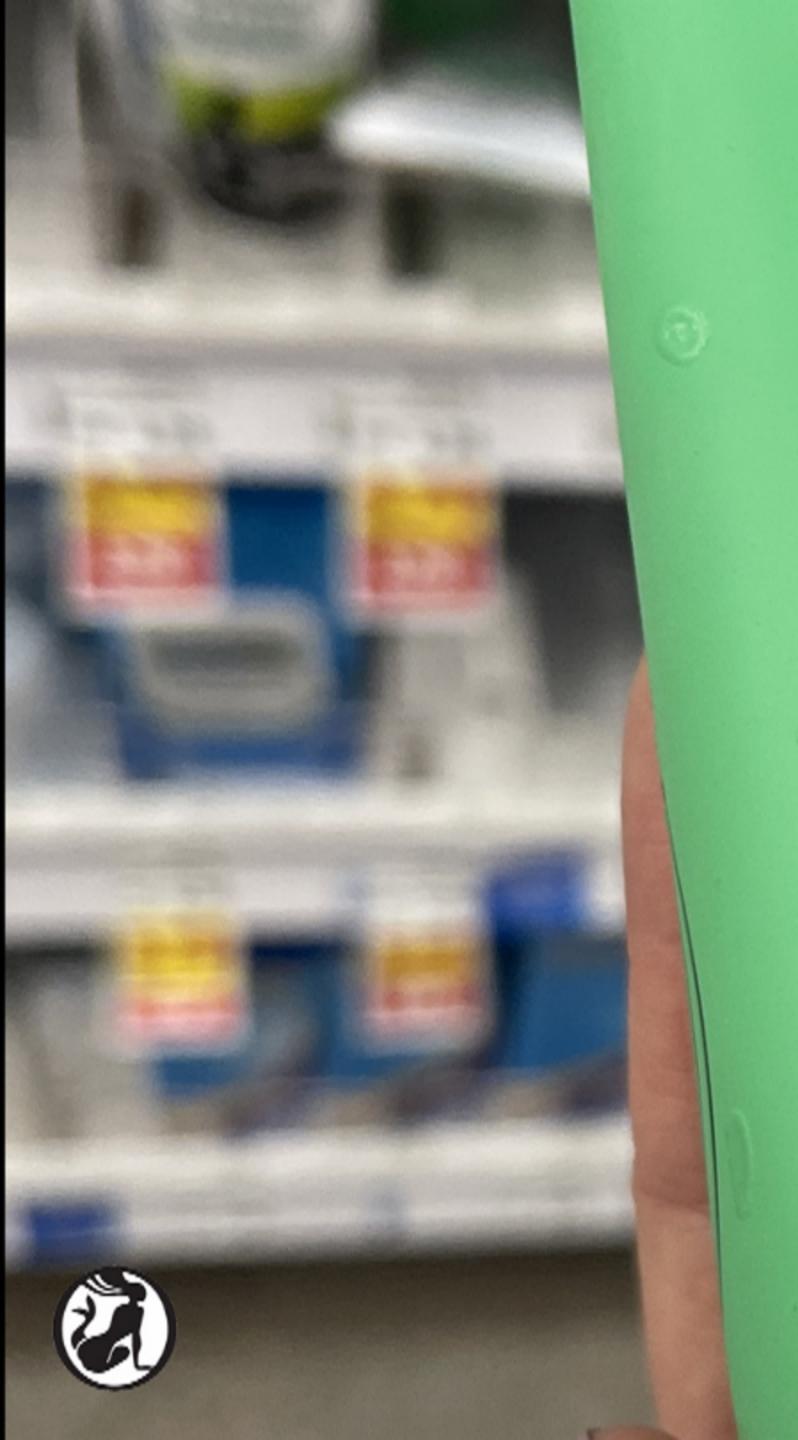

There is nothing bad about wanting to look your best.

And as with all things, there are cosmetics that are made with safe ingredients.

And those that aren't.

We will help you learn to find makeup that is good for your skin.

hydration.

for deliciously fresh, clear, hydrated skin

to use: gently massage over damp face, avoiding eyes. rinse face. use daily.

caution: for external use only.

Ingredients: Water, Sodium C14-16 Olefin Sulfonate, Cocamidopropyl Hydroxysultaine, Glycerin, Sodium Hydrolyzed Potato Starch Dodecenylsuccinate, Acrylates Crosspolymer-4, Cellulose, Fragrance, Citrullus Lanatus

You will quickly learn that the cosmetic industry is required by the FDA to list all ingredients by descending order of their volume.

Be prepared:

Most cosmetics contain ingredients you never heard of...

And so many it will shock you.

This is our *Skin Safety Series* and it will show you how, with your cell phone's camera and looking up ingredients online, you will find out just what you have been putting on your skin.

It's not hard to do, and remember:

It's YOUR SKIN, not theirs!
