

Measurement of dissolved gas (CO_2 and CH_4) requires an equilibrator. This Wet-Box integrates both a sampling pump and a membrane contactor to facilitate these measurements in the field.

Air loop and power supply connectors (left)

Pump activation-direction and water loop connectors (right)

Specifications

- 36 x 21 x 21 cm
- 3 kg
- 12V DC

Advantages:

- ◆ **All in one: pump and equilibrator**
- ◆ **Sampling at 3 LPM and up to 50 meters deep**
- ◆ **Perfect match for gas analysers such as SAGES**
- ◆ **Simplify gas equilibration setup**
- ◆ **Different sampling mode:**
 - ◆ **Gaz equilibration**
 - ◆ **Raw water sampling**
 - ◆ **System drain and ambient air reset**
- ◆ **Small footprint**
