

JR. SOFTWARE ENGINEER

Full Time Employment / Lifelong Career

AGUADILLA, PUERTO RICO

Opportunity:

ESPR (Executive Search Puerto Rico Inc.) supports the development of the hottest new companies in Puerto Rico. In 2018, a group of brilliant entrepreneurs launched the IHQ (International Head Quarters) of a successful, 40 year old, Global Markets Quantitative Proprietary Trading Firm. We are seeking candidates to interview for open positions on-site in All Departments.

This is both a tremendous learning and growth opportunity in a sustainable hi-tech company with vision. A chance to join a think tank of intelligent professionals: Algorithmic Traders using next-gen technology, barefoot & wearing T-shirts. High Tech Wall Street Meets Aguadilla Tropical Paradise.

We are searching for some talented IT folks including a JR Software Engineer (described below), Network Analyst, Unix Systems Engineer, Python Developers, Global Tax Specialist, Staff Accountant and more. We are seeking entrepreneurial spirited, well-educated Professionals with impressive accomplishment examples of their work ethic, drive, hunger to learn, and desire for growth.

Job Title: JR. SOFTWARE ENGINEER

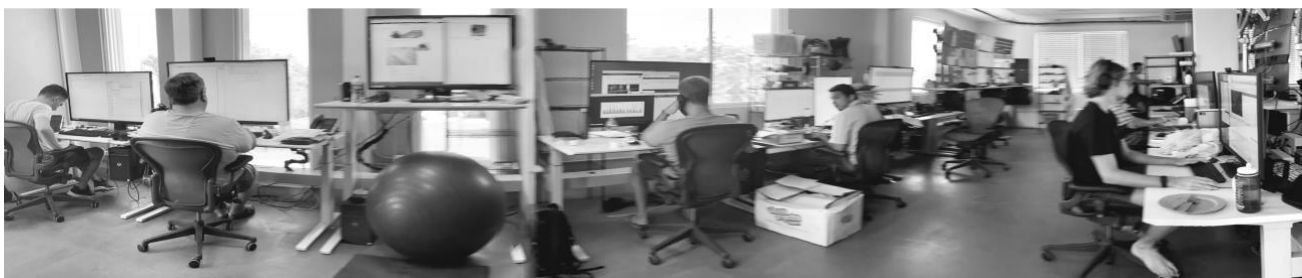

Description:

Your Employer is a Puerto Rican Act 20 company, established to export services such as centralized management (group “headquarters” for an established trailblazer in the industry), capital allocation, risk management, model and strategy research and development, and software development, to its international affiliates and customers.

The company uses next generation technology to capture opportunities around the world and manage risk in financial markets. They have an entrepreneurial culture and collaboratively develop the business with patience and discipline; work hard, learn constantly, and relentlessly improve expertise. The company has the intensity and passion of a technology start up while maintaining the stability and storied history of a respected member of the global financial system.

The opportunity before this Team is enormous. Trading organizations around the world extract hundreds of billions of dollars in profits each year for the service of facilitating risk transfer and restoring order to prices that inform all economic decisions. The markets will always need liquidity providers; our job is to be the best.

Responsibilities:

- Work with Sr. Software Developers to assist and learn all facets of software development applied to the automated trading business,
- Develop, code, maintain, and support production quality automated components for global proprietary trading,
- Develop expertise in software development principles, C++, and high performance automated trading systems,
- Collaborate with technology, software, trading, business, and accounting/finance team.

Requirements:

- Passion for software and math applied to markets and trading,
- Strong understanding of computing, math, probability, statistics, finance also preferred,
- Programming proficiency and experience (C++, C#, Python). Linux scripting a plus,
- Strong work ethic and willingness to do what it takes to get the job done,
- Ability to work in a fast paced team environment,
- Excellent verbal and written communication skills,
- Bilingualism a plus,
- Bachelor's, master's, or doctorate degree in a technical or industry related field.

Compensation:

- Salary Commensurate with Expertise and Years of Experience,
- Shared Annual Bonus(s) Customary,
- Healthcare Benefits,
- Free Parking,
- Company commits to extensive Staff Training and Development activities,
- There is Prospective Opportunity for International Travel to Meet your Colleagues.

The company is an equal opportunity employer. All qualified applicants will receive consideration for employment without regard to race, color, gender, sexual orientation, gender identity or expression, religion, national origin, marital status, age, disability, veteran status, genetic information, or any other protected status.
