5 E-stop	12 USB port
6 Hose bracket for Applicators	13 Air switch
7 Applicator #1 - #4	14 Power supply

# POWERSCULP LASER BODY CONTOURING

WarmSculpting with PowerSculp, should be another good option for those who are not happy with their stubborn fat and keep looking for perfect body.

PowerSculp is a convenient body contouring treatment that can be done in 25mins without disrupting the skin's surface, and more than 25% fat cells can be removed in the treated area. Fat cells will be gently heated up and expelled through the body's lymphatic system and those fat cells will not regenerate. The patients will notice good result in 6 weeks after the first treatment.

1060nm New generation non-invasive laser system for permanent fat reduction

# HOW POWERSCULP WORKS?

PowerSculp is a non-invasive body contouring method that's designed to quickly and effectively eliminate excess body fat throughout the body.

It's the world's second FDA-cleared laser treatment for lipolysis (the breakdown of fats), and it can be used on fat in the abdomen, flanks, back, thighs, and even under the chin. Unlike traditional liposuction procedures, no scalpel or knife is needed, and downtime is non-existent.
