

PARTS BAG

M3x8 flange head screw x2

PEBA Steering Damper x 1

15mm Standoff x 1

HACHI STEERING DAMPER ASSEMBLY

It is easier to install the damper if the steering plate is removed. Remove the two servo horn mount screws, and detach the steering arms from the knuckles.

* some chassis parts are not displayed for clarity

Slide damper down over the two front standoffs

Use thread lock (recommended)

Slide damper over the bottom of the 15mm standoff

Lower flange screw prevents damper from slipping off standoff
