Separation Anxiety Packages

INITIAL ASSESSMENT – 120\$

Just learning to be left alone, or is your dog struggling and scared? Getting a pair of professional eyes on the matter can help us determine where we go from here. Together we will develop a plan of action before we fully immerse ourselves into the training.

1x fifty-minute Virtual Assessment

- Live execution of an absence, with a trainer documenting time stamped body language details.
- Discussing management and problem-solving suspension of absence before executing training.
- During the session you will be provided detail next steps of what program and training approach would be best suited for your dog and tailored to your needs as an owner.
- Letter for vet can be constructed and provided on request if medical assistance and vet check is necessary prior to initiating the training.

Access to our **“My Dog’s Separation Anxiety Assessment”** course. Prior to sign up you will be sent our **“What is Separation Anxiety?”** course that we encourage you to complete prior to your assessment. In addition, we will require a google form questionnaire be completed prior to your assessment along with viewing the first module of **“My Dog’s Separation Anxiety Assessment”** – Preparing for an Initial Assessment.

Upon completion of the assessment, you may be encouraged to follow these avenues:

1. Your dog didn’t show body language indicators that align with Separation Anxiety during the assessment. Your dog could however be struggling with other kinds of training needs (chew training, crate training etc...). Our evaluation could have been insufficient or additional support from your vet may be needed to make a better conclusion of how best to support your dog. We encourage owners to follow-up accordingly and monitor their dog in any case.
2. Your dog is showing signs of Separation Anxiety:
 - Consult with a vet (and/or a vet behaviourist)
 - Suspend absences – ensuring your dog is always in the company of their owner or a trusted individual.
 - Start training:
 - i. “The Beginning” Separation Anxiety Training Package provides our best support – see below
 - ii. DIY option – Mission Possible Course, and booking 1-off Consults as needed
 - iii. Not train – and just opt to manage.
