Introduction

ClearLeafCoin (CLF) is a decentralized ERC-20 token built on the Ethereum blockchain, designed to empower and engage a thriving community while ensuring sustainable liquidity and rewarding the dedicated team behind the project. CLF leverages Ethereum's secure and widely adopted infrastructure, offering transparency, security, and seamless interoperability within the growing decentralized finance ecosystem. As the community grows so will our mission, going where the market wants to take us. Our end goal is to start a decentralized asset trading market and maintain that for years to come.

Mission and Vision

➔ Mission

- Distribute tokens fairly to the community
- Ensure liquidity and exchange presence for smooth trading.
- No Pre-Sale! We have seen the failed pre-sales, we will not be one. We will instead launch on more platforms as we grow/gain support.
- Incentivize the team for continuous improvement and innovation.

➔ Vision

To build a vibrant, community-driven token that fosters long-term growth and adoption while maintaining robust liquidity and rewarding contributors who support the project's ongoing development. ClearLeaf will be a proven example of community trust in a decentralized environment - our investors will shape the future

Token Overview

Digital Specs:

Name: ClearLeaf Coin

Symbol: CLF

Blockchain: Ethereum(ERC-20)

Total Supply: 100,000,000 CLF

Decimals: 18

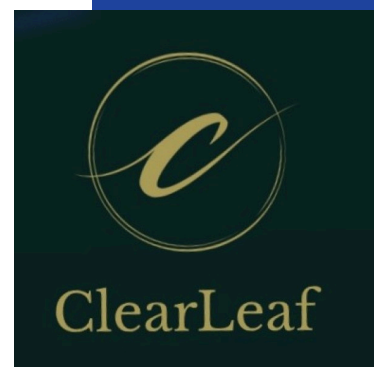

Originating Contract Address:

0x5C6a0Ec55013b839104017E44Af90baadcAe100D

Tech Specs:

ClearLeafCoin adheres to the ERC-20 token standard, ensuring compatibility with wallets, exchanges and DeFi protocols. The contract is deployed with the following key features:

- Fixed total supply of 100 million CLF tokens.
- No further minting after initial deployment (immutable supply).
- Owner privileges for contract administration, limited to essential tasks.
- Transparent, auditable token transfers and balances.

TOKENOMICS

ClearLeafCoin has been carefully designed with a balanced distribution to align incentives across stakeholders.

5,000,000 CLF

Team

5%
5,000,000 CLF

Tokenomics Explained

- **Community (75%)**

- The majority of tokens are allocated to the community to encourage participation, growth, and decentralized ownership. This allocation will be distributed through various community engagement initiatives and exchanges. We will collect votes via our website/social media for user input along the way

- **Dex/CEX/ Liquidity (Total 15%)**

- Tokens reserved for liquidity provisioning on decentralized exchanges (DEXs) such as Uniswap, as well as centralized exchange listings. This ensures the token maintains healthy liquidity, facilitating seamless trading with minimal slippage and fostering price stability.

- **Future Development (5%)**

- These tokens are allocated for the future development of the ClearLeaf Coin. This will be distributed over time as needed to further develop and secure CLF's position in the market

- **Team (5%)**

- Reserved for the founding and development team as an incentive and reward for their ongoing commitment to the project's success. These tokens will be subject to a vesting schedule to align long-term incentives.

Roadmap

Q1 – Q2 2025
Launch and Distribution

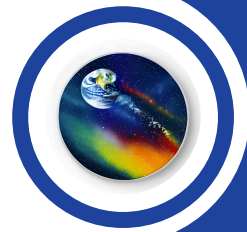

Our token is already moving! With the initial token contract being established 6/7/2025 Distributions and listings to follow shortly

Q2 – Q4 2025
Additional Listings

ClearLeaf Coin Uniswap Launch Complete!
Uniswap Launch Date: June 14th 2025

Our next goal is to list on 1 to 2 more DEX sites
We are already actively working on the market!

2026
CEX Listings

ClearLeaf will aim for CEX (Centralized Exchange) listings in 2026 – Depending on feedback

We aim to make a better version of some of the big trading platforms out there
(Crypto version of Etsy, eBay, Craigslist)

2026+
Future Development

Ecosystem Expansion & Governance Implementation – Along with adding additional Use Cases

Uses and Security?

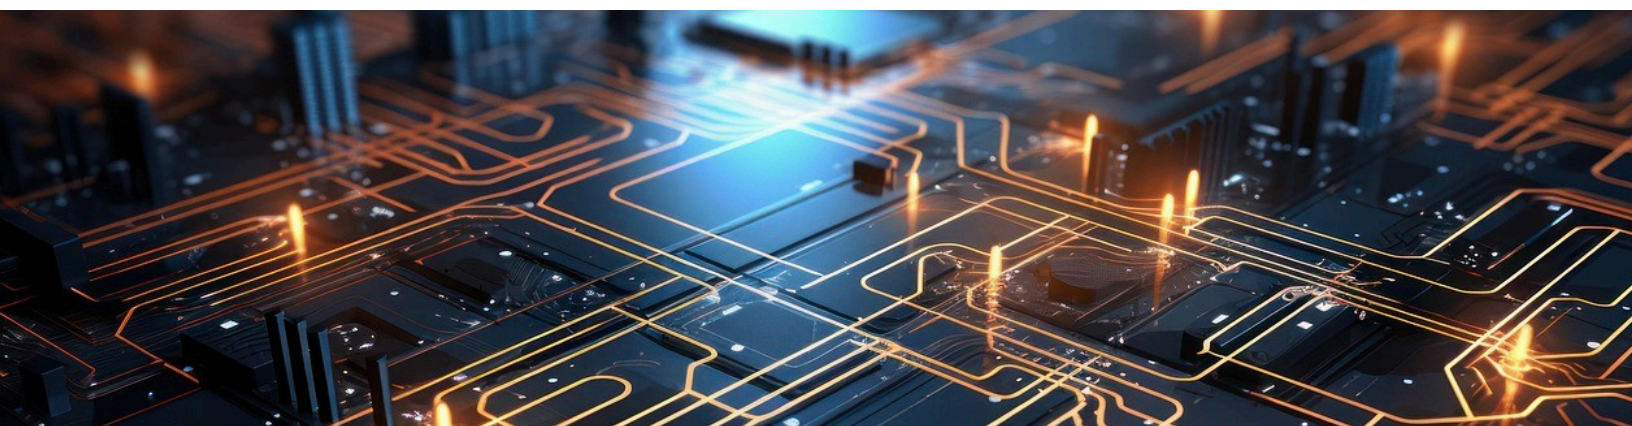

➔ Use Cases:

- **Community Rewards:** Incentivize holders and active contributors through staking and governance participation.
- **Trading & Liquidity:** Enable smooth trading with healthy liquidity pools on DEXs and CEXs.
- **Governance:** Future integration for decentralized decision-making, empowering holders to shape the project's direction.

➔ Security & Transparency:

ClearLeaf Coin smart contracts are developed following best practices, with planned audits from reputable third parties before each major release. Token holders benefit from full transparency on token supply, transactions, and contract ownership. CLF has the security of the ETH network behind it!

Ultimately CLF aims to be extremely upfront and active with its community. No surprises, No tricks, No gimmicks

Conclusion

- ClearLeafCoin offers a robust, community-centered ERC-20 token with strong tokenomics designed to drive growth, liquidity, and long-term value. By aligning incentives among community members, liquidity providers, and the team, CLF aims to become a trusted and widely used asset within the Ethereum ecosystem.
