

# 10 Tunes to Teach by Ear

*For piano and keyboard – beginner to advanced*

- Attractive tunes in a variety of genres
- Many top tips to help you teach without the dots
- Opportunities to develop aural, creative and ensemble skills

## **10 tunes to teach by ear**

This resource will help you to teach tunes by ear. It will significantly develop your pupils' aural and ensemble skills, whilst consolidating technique.

The tunes are varied in terms of genre and background, and appear with simple accompanying parts, which ensure that a range of abilities can participate. All or some of the accompanying parts can be used, depending on the size and nature of the group. The material can be used for individuals, and groups of all sizes.

The resource is particularly aimed at helping you teach pupils tunes they don't already know – as opposed to helping them work out tunes they already know.

There are multiple top tips to help you teach the tunes, no matter what your previous experience is of playing/teaching by ear. Please don't forget that my videos will explain further the various methods of teaching by ear. These videos are for all instrumental families, and can be found on my website: [musicwild.co.uk](http://musicwild.co.uk).

[Videos \(musicwild.co.uk\)](http://musicwild.co.uk)

For a whole range of activities, including teaching with notation and without, and improvisation, please see my book – 'Wild About Piano and Keyboards'. This helps you to teach a comprehensive range of skills, whilst consolidating technique, from beginner level onwards. It is available from Amazon, and other online retailers.

[Wild About Piano and Keyboards: Inspiring, effective teaching resources: Amazon.co.uk: Wild, Ruth: 9798362768263: Books](http://Amazon.co.uk: Wild, Ruth: 9798362768263: Books)

There are many tips included in 'Ten Tunes to Teach by Ear'. Most of the tips apply to all the tunes.

I have left technical and musical details such as dynamics, articulation and phrasing to the teacher's discretion, or the choice of the pupil.

All tunes have chord symbols, for use by keyboard players. Much of the material can be used with tuned percussion.

Don't forget that, as tunes are taught aurally, fingers can be placed at any octave – there is no need for pupils to know the notation for, for instance, the C which is two octaves higher than middle C. One of the advantages of this is that two or three pupils can be accommodated easily at one piano.

More advanced material appears in the latter half of the resource, and additionally, the keys of all the tunes can be altered to increase the level of difficulty, as desired. Parts can be played with either right hand or left. More advanced players can learn the tune and an accompanying part, and play together, with particularly advanced players playing the tune in the left hand. More complex chords can be substituted for those suggested for added difficulty.

# Uncle Bernard's Polka

Trad. English

The musical score for "Uncle Bernard's Polka" is written in 4/4 time. It consists of three systems of music, each with a vocal line and three piano accompaniment staves. The lyrics are: "I have a fish strip-y and small I have a fish strip-y and small I have a fish strip-y and small". The chords are indicated by letters C and G. The score includes repeat signs and a double bar line at the end of each system.

1 *I have a fish strip-y and small I have a fish strip-y and small I have a fish*  
C G C C

6 *strip-y and small I have a fish strip-y and small I have a fish strip-y and small*  
G C C

11 *I have a fish strip-y and small I have a fish strip-y and small I have a fish strip-y and small*  
G C C G C

### Top tips

The percussive part can be played by clapping, or tapping on the instrument.

The accompanying parts can be taught by using body parts – see the first video on [musicwild.co.uk](http://musicwild.co.uk).

The melody can be taught in segments – a little bit more each time, whilst you play the tune – see example below and the second video on the website.

As the pupil doesn't know what is coming up, they will need help with fingering, for example to change from finger 5 to finger 2 on the Gs in bar 6.

Ask pupils to spot if there are any repeated sections.

The key can be changed for added difficulty.

Teacher

Pupil joins in with...

then joins in with...

then joins in with (see bar 6)...

5

## Morning from Peer Gynt

The image displays a musical score for the piece 'The Swan' by Gabriel Grieg. The score is written for three staves: Treble, Alto, and Bass. The key signature is one sharp (F#), and the time signature is 3/4. The Treble staff includes chord markings: G, G, G, G, G, Em, G, and a first ending (1. G) and second ending (2. G). The Alto and Bass staves provide harmonic support with various note values and rests. The piece concludes with a double bar line and repeat signs.

**Top tips**

Classical tunes can be taught by ear too.

Drones are a great way to include less experienced players.

For accompanying parts use body parts, as in Uncle Bernard's Polka.

To help teach the tune, first do some echo playing including intervals from the tune, such as D to B and E to B.

This pentatonic tune can be shared between hands – D and E with the R.H. and G, A, B with the left. It can then also be played on black notes only for added fun.

# Hunt the Squirrel/Hela'r Wiwer

Trad. English/Irish/Welsh?

6

Mo the squirr-el lives in the woods Mo the squirr-el lives in the woods Mo the squirr-el

G G G D G D G

6

lives in the woods Mo the squirr-el lives in the woods Mo the squirr-el lives in the woods

G G D G C C

11

Mo the squirr-el lives in the woods Mo the squirr-el lives in the woods Mo the squirr-el lives in the woods

C C G G G D G

**Top tips**

Use tunes taught by ear to help teach or reinforce arpeggios or scales.

Use words to help pupils remember the percussion part or the riff (first and third staves). Pupils can make up their own words if the rhythm is played to them - see first video on [musicwild.co.uk](http://musicwild.co.uk).

For pupils learning the bassline (fourth stave), play the tune with them as soon as possible, and they will 'feel' where to change note.

More advanced pupils could learn the melody and the bass line and play them together.

Folk tunes are often well-known in different geographical areas, and nobody can be completely certain from where they originate.

# Lashon' ilang' uMam' akabuyi!

Trad. Zulu

Shuffle feel

5

G Am D G Am D G

### **Top tips**

It's essential to get the right swung 'feel' for this, both in the melody and the middle part. I suggest listening to the beginning of 'Diamonds on the Soles of her Shoes' (Paul Simon and Ladysmith Black Mambazo) with your pupils. Also repeating 'banana' can help! Pupils playing the third part could also play their notes on the 'groove' rhythm.

The tune is like a conversation – first two phrases (to end of bar 4) person a), second two phrases person b). Drawing attention to this can help memorise the tune.

Pupils learning the tune can learn the other parts too. It will help give them the feel of the groove, and of the harmonic structure.

Not all parts need to play all the time – see the third video on [musicwild.co.uk](http://musicwild.co.uk) for ideas about arranging, and including pupils in musical decision making.

# Oh Them Britches Full of Stitches

Trad. American/Irish

Chords indicated above the melody staff:

System 1 (Measures 1-8): D, D, D, G, D, D, G, A

System 2 (Measures 9-16): D, D, D, G, D, D, G, A

**Top tips**

Familiarise pupils with the notes/rhythms from the tune by playing a relevant scale with a rhythm or melodic figure taken from the melody. For instance, the first three notes of bar seven could be used, playing the figure on each note of the bottom half of a D major scale: D ED, E F#E etc. See more how this strategy works on the second video on [musicwild.co.uk](http://musicwild.co.uk).

Folk/traditional tunes are useful for introducing pupils to learning music by ear, as they often contain repetition.

More advanced pupils could play the tune together with either of the accompanying parts.

# Wade in the Water

Spiritual

8

14

19

**Top tips**

The tune has a call and response feel. In a group setting, split the group into two, and ask each group to play two bars each at a time. Then swop parts. This gives a satisfying feel, and helps the group to memorise the tune.

You can make accompanying parts as difficult as you like, but always ensure that they are memorable, and quick to learn. Whilst playing the accompanying parts and simultaneously listening to you play the melody, pupils have the opportunity to internalise the melody, whilst being musically involved.

# Mopsi Don

Trad. Welsh

1 A A D D

5 A A D G A D

9 D A D A D A

13 D A D A D G A D

### Top tips

To help remember the sections and piece them together, it is useful and fun to associate them with something else. For example, bars 9, 10, 13 and 14 could be 'the waterfall bits'. Encourage ideas from your pupils.

Sometimes tunes, or parts of a tune, lend themselves to being taught as 'a skeleton' first (see example below). It is important to note that all of the strategies in this resource help pupils to recognise where they are in a piece. This helps them to learn it, and to get an understanding of structure.

For performances it is helpful to add accompaniments played by experienced musicians. This could be piano or keyboard, and perhaps bass and drums.

# Bourrée

Trad. French

C C C G<sup>7</sup> C C G<sup>7</sup> 1. C

Optional R.H. part if melody played by L.H.

9 2. C F C G<sup>7</sup> C F C G<sup>7</sup> 1. C 2. C

**Top tips**

Teach segments at a time – smaller then larger, as in previous tunes, such as Uncle Bernard's Polka.

You can teach each segment by singing it and asking pupils to copy back on their instruments. (Singing ensures that pupils use their ears, and don't just copy your fingers.) Then play the segment repeatedly – on a loop – to really internalise it.

When pupils play only their segments whilst you perform the tune in its entirety, they may need help to know precisely when to play. You can sing the intervening bits, 'ghost' them in (play quietly), or make a gesture with your body to indicate where pupils join in again. (See second video on [musicwild.co.uk](http://musicwild.co.uk).)

Advanced players can learn the to play the tune in the left hand, whilst accompanying themselves with the middle part played by the right hand.

# Logan Water

Trad. Scottish

The musical score for "Logan Water" is presented in three systems, each consisting of three staves (treble, middle, and bass). The key signature is one flat (B-flat), and the time signature is 4/4. Chord annotations are placed above the treble staff of each system.

**System 1 (Measures 1-5):**

- Measure 1: Treble (G4, A4), Middle (G4), Bass (G3).
- Measure 2: Treble (A4, Bb4), Middle (G4), Bass (G3).
- Measure 3: Treble (Bb4, A4), Middle (G4), Bass (G3).
- Measure 4: Treble (A4, G4), Middle (G4), Bass (G3).
- Measure 5: Treble (F4, E4), Middle (G4), Bass (G3).

**System 2 (Measures 6-11):**

- Measure 6: Treble (F4, E4), Middle (F4), Bass (F3).
- Measure 7: Treble (D4, C4), Middle (G4), Bass (G3).
- Measure 8: Treble (C4, B3), Middle (G4), Bass (G3).
- Measure 9: Treble (B3, A3), Middle (G4), Bass (G3).
- Measure 10: Treble (A3, G3), Middle (G4), Bass (G3).
- Measure 11: Treble (F4, E4), Middle (G4), Bass (G3).

**System 3 (Measures 12-16):**

- Measure 12: Treble (E4, D4), Middle (E4), Bass (E3).
- Measure 13: Treble (D4, C4), Middle (G4), Bass (G3).
- Measure 14: Treble (C4, B3), Middle (G4), Bass (G3).
- Measure 15: Treble (B3, A3), Middle (G4), Bass (G3).
- Measure 16: Treble (A3, G3), Middle (G4), Bass (G3).

### Top tips

If part of the melody alternates with different material you can relate the piece to a sandwich, with the recurring tune being bread, and the other material being fillings – for instance, from the last beat of bar 8 to the dotted quaver in bar 9 and from the last beat of bar 10 to the dotted quaver in bar 11 could be slices of bread, whilst the semiquaver in bar 9 to the third beat (inclusive) in bar 10 and the semiquaver in bar 11 to the third beat (inclusive) in bar 12 could be a sandwich filling and a sandwich topping respectively.

From the last beat of bar 4 to the end of that section - the third beat of bar 8 inclusively – there is not much repetition, so the method suggested in, for instance, Uncle Bernard's Polka doesn't work so well. Instead, teach the first three notes of that section, then the first five then, the first eight etc.:

\*C D I E<sup>b</sup>

C D I E<sup>b</sup> D C

C D I E<sup>b</sup> D C I D C B<sup>b</sup>...

\*I = barline

This is a bit like the memory game, where person a) says: 'I went to the shop to buy an orange'; person b) says: 'I went to the shops to buy an orange and a bag of sugar' and so on.

Advanced pupils can experiment with ornamentation. Listening to versions of the tune on YouTube can give them ideas. See the third video on [musicwild.co.uk](http://musicwild.co.uk) regarding musical decision making for more advanced students.

# Kopanitsa

Trad. Bulgarian

11/8

Cat-er-pill-ar butt-er-fly cat-er-pill-ar

Em Em

3

Am B Em B

6

B Em Am B B Em

**Top tips**

The time signature of this tune makes it ideal to use with advanced students.

As in earlier tunes, words can help to feel the rhythm, and it is useful to teach the percussion part and harmony part first.

To find the first two notes in the tune, you can include the interval in a copying back exercise, or play/sing each note and ask pupils to match the pitch on their instrument.

In the 'A' part start by learning the first three notes of the tune in each bar, then the first five.

The version of the tune that I have used here is slightly simplified for ease of memorisation.

## Going forward

You will probably want to source some tunes yourself now. Those featuring stepwise movement, some repetition, and a simple harmonic structure are best to start off with. English, Welsh, French and American Old Time folk tunes, and spirituals are a good place to start.

Learning by ear will develop aural and ensemble skills – great ends in themselves, but it's also important to integrate the learning with other skills. Use the material to consolidate technical learning. Tailor the tunes accordingly, for instance by changing the key for advanced pupils, or devising easy parts for beginners. For easy parts it's helpful to think in terms of basslines and riffs or ostinati. For more advanced players, both the melody and another part could be played by the same student. Additionally, the tune could be played in the left hand, and the accompanying part in the right. Chord sequences can be devised to create the appropriate level of demand.

There are many strategies described above, and you will find that some suit one tune, and some another. Always keep learning rhythmic and try to help students maintain an idea of where they are in the tune – a feeling of navigating it.

If the tune or accompanying part has been internalised, *or* the pupil has a recording at home (this could be, for instance, you or YouTube), a whole lesson may be spent on it, as the learning can be easily continued at home. If this is not the case, spend part of the lesson working on the material, and return to it the following week. This way you will be able to ensure that enough time is spent on the things pupils *can* practise at home.

Remember that full explanations of these methods are demonstrated on [musicwild.co.uk](http://musicwild.co.uk):

[Videos \(musicwild.co.uk\)](http://musicwild.co.uk) – the first one for accompaniments, the second for melodies, and the third one for creativity - musical decision making. They can be used for all instrumental families.

My book 'Wild About Piano and Keyboards' will help you to integrate learning new music without notation into a holistic curriculum, which includes learning from notation too. This is available from online retailers such as Amazon:

[Wild About Piano and Keyboards: Inspiring, effective teaching resources: Amazon.co.uk: Wild, Ruth: 9798362768263: Books](https://www.amazon.co.uk/Wild-Ruth-9798362768263/dp/B000000000)
