

**Sewage Enforcement Officer
Local Agency
2026 Fee Schedule Breakdown**

New or Replacement On-lot Sewage Disposal System:

Review and Permitting: **\$100.00**

Review property boundaries; verify isolation distances; review design drawings; and issue results letter or permit denial. Permit denial will include soil reports; sketch of test pit locations; and sewage planning needs as required for a small flow treatment system.

Soil Probe Evaluation: **\$300.00**

It is the responsibility of the property owner to arrange for excavation equipment to prepare test pits. The above fee provides for one hour of soil evaluation. Each additional hour will result in additional fees.

Percolation Test: **\$300.00**

Property owner will be responsible for preparing the percolation holes and providing adequate water to perform the test. Insufficient test holes will result in additional fees.

Final Inspection: **\$100.00**

Covers any inspections prior to approval for completion of the system.

Reconstructive Planning: **\$50.00**

Procedure that must be followed if a parcel/subdivision has not been properly planned. Requires additional lot survey, planning module completion and notification of municipal officials.

Improperly Prepared Sites: **\$50.00**

If an appointment for testing or inspection is not met by the contractor without sufficient notice (at least one day) or if test probes or percolation holes have been prepared incorrectly.

Prepare Percolation Test Holes: **\$250.00/test site**

Layout percolation test holes as needed, dig percolation holes, and provide water for percolation test.

Insufficient Design Plans: **\$25.00**

If incomplete or incorrect design plans are submitted, the plans will be returned with recommendations for corrections. Permits will not be issued until a sufficient plan has been submitted. Fee will be charged for each time plans are returned.
