## Client Responsibilities

- a. The client is responsible for providing WTFGPT with necessary payment information and ensuring timely payments according to the agreed terms.**
- b. The client must ensure secure storage of all data processed through our services.**

## Billing and Payment

- All transactions are handled through third-party payment processors, Payments must be made on the same date each month, failure to pay will result in a loss of access to services.**

## Delivery Timeline

- Once the first payment is received, wtfgpt begins. The second payment is due when the client is able to access all the services described in this SOW. All products/services will be delivered within 60 days of the initial payment. Services will resume when payment is received.**

## Non-Payment Clause

- Failure to pay may result in suspension of server access after a grace period. In case of non-payment for more than two weeks, services will be terminated and servers reinitialized for new customers.**
