2 generated files

Marketplace Support not included

PROFESSIONAL • V1.0.0

SecurePass Builder Pro

Security & Identity

5 generated files

Basic Marketplace Support included

CURRENT • LITE • V1.0.0

Configuration Delta Builder Lite

3 documented outputs · Support not included

GROWING PORTFOLIO

Configuration Delta Builder Pro

COMING SOON

The Configuration Delta Builder family is expanding, with a Professional edition coming soon.

Constant Labs® Marketplace Product Catalogue

2 / 9

Compliance Builder

Offline compliance baselines and structured reporting, with a Professional extension for dynamic comparison and evidence packaging.

SHARED FAMILY FOUNDATION

Offline compliance baselines · structured reporting · governed local execution · integrity validation

LITE

Compliance Builder

LITE · V1.0.0

Compliance Builder Lite

Offline compliance reporting for CLTK.

- Repeatable baseline outputs
- Structured HTML and CSV reporting
- Local/offline governed workflow
- Evaluation and non-production scope

2 reporting files

Marketplace Support not included

See resource directory →

PRO

Compliance Builder

PROFESSIONAL · V1.0.0

Compliance Builder Pro

Advanced offline compliance reporting and automation for CLTK.

- Dynamic profile processing
- Baseline and delta comparison
- Structured evidence bundling
- Integrity manifests and governed local execution

6 documented outputs

Basic Marketplace Support included

See resource directory →

Professional builds on the shared family foundation with expanded workflows and capabilities.

SecurePass Builder

Local credential generation and encrypted storage, with Professional extensions for managed vaults, recovery and tamper-evident auditing.

SHARED FAMILY FOUNDATION

Secure password generation · AES-256 encryption · audit logging · governed offline execution · integrity validation

LITE

SecurePass Builder

LITE · V1.0.0

SecurePass Builder Lite

Offline credential generation for CLTK.

Secure password generation

AES-256 encrypted local storage

Append-only audit metadata

Evaluation and non-production scope

2 generated files

Marketplace Support not included

[See resource directory →](#)

PRO

SecurePass Builder

PROFESSIONAL · V1.0.0

SecurePass Builder Pro

Advanced offline credential management for CLTK.

Managed encrypted vaults and key wrapping

Controlled credential recovery

Credential lifecycle management workflows

SHA-256 hash-chained tamper-evident audit validation

5 generated files

Basic Marketplace Support included

[See resource directory →](#)

Professional builds on the shared family foundation with expanded workflows and capabilities.

Choose the right edition

Start with the intended use, then apply the product-specific licence. Enterprise extends licensing and services; it is not a separate packaged product.

LITE Evaluate and learn • Evaluation, learning and internal testing • Non-production use in approved environments • Marketplace Support not included • Focused capabilities for evaluation and learning	PROFESSIONAL Operate with production scope • Production and commercial workflows under the applicable licence • Expanded product capabilities • Basic Marketplace Support included • Product-specific licensing terms apply	ENTERPRISE Scale licensing and services • Organisation-wide or multi-environment licensing where agreed • Deployment assistance or broader support services • Direct engineering engagement where supported • Licensing/service layer — not a packaged SKU
--	--	---

A practical selection sequence

01 Define the workflow Evaluation, professional operation or organisation-wide deployment.	02 Choose the capability Compare the current product families and their governed edition paths.	03 Confirm the terms Apply the product-specific licence and any separately agreed Enterprise arrangement.
---	--	--

Built for CLTK

A concise global compatibility view for local Marketplace workflows. Product-specific requirements remain in each Product Sheet.

CURRENT CLTK BASELINE

CLTK v2.2.1+

Governed local operation across the current Marketplace portfolio.

WINDOWS

Windows 10, Windows 11 and Windows Server

Supported host platforms for the governed CLTK workflow.

POWERSHELL

Windows PowerShell 5.1 minimum

PowerShell 7 is supported and recommended where available.

LOCAL RUNTIME

No internet connection required

Marketplace add-ons operate locally and offline at runtime.

FILESYSTEM

Ordinary local permissions

Read/write access is required only for selected working and output locations.

ENGINEERING NOTE

This catalogue summarises the shared operating model. Refer to the Engineering Compatibility Matrix for detailed platform requirements.

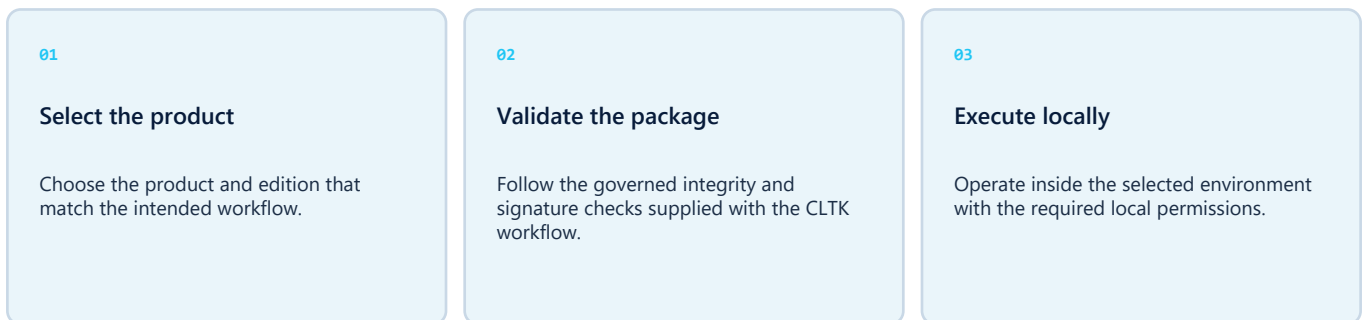

Trust, verification and local control

A catalogue-level orientation to governed local use.

Constant Labs uses a governed local verification model designed to support release integrity, signature validation and controlled local execution.

How to use this orientation

Refer to the Trust & Verification Model for the complete verification chain.

Marketplace resources and how to explore

Use the product pages for product-level discovery, then confirm the applicable Product Sheet and licence before operational use.
