

Notes

Cisco Switch Initial Configuration Template

Introduction

This configuration template provides a structured approach to configure a network device with necessary settings. It ensures proper functionality and security measures are in place.

How to Use

Replace Placeholders: Replace placeholders like XX-X- and with appropriate values specific to your network setup.

Copy Configuration: Copy the configuration provided below and paste it into the command-line interface of your network device.

Review and Modify: Review the configuration to ensure it meets your requirements. Modify any settings as necessary.

Apply Configuration: Apply the configuration to your network device.

Requirements

Access to a network device's command-line interface. Basic understanding of network configurations. Necessary privileges to modify device settings.

```
! Configuration Template
!
! Note: Replace placeholders like XX-X<XXX>-<XX> and <PortNumber> with appropriate values.
!
! Enter privileged exec mode
enable
!
! Enter global configuration mode
configure terminal
!
! Set software version
version <SoftwareVersion>
!
! Disable unnecessary services
no service pad
service timestamps debug datetime msec
service timestamps log datetime msec
no service password-encryption
no service dhcp
!
! Set hostname
hostname <Hostname>
!
! Set system MTU
system mtu routing <SystemMTU>
!
! Configure Spanning Tree Protocol
spanning-tree mode pvst
spanning-tree extend system-id
!
! Set VLAN internal allocation policy
vlan internal allocation policy ascending
!
```

```
! Configure interfaces
interface FastEthernet0/1
description **** Link to XX-X<XXX>-<XX> <PortNumber> ****
shutdown
speed 100
duplex full
!
! Repeat for remaining interfaces...
!
interface GigabitEthernet0/1
description **** Link to XX-X<XXX>-<XX> <PortNumber> ****
shutdown
speed 1000
duplex full
!
! Configure VLAN interface Management IP
interface Vlan1
ip address <ManagementIP> <SubnetMask>
no shutdown
!
! Configure HTTP server
ip http server
ip http secure-server
!
! Enable VLAN stacking
vstack
!
! Set enable secret for console
enable secret <ConsolePassword>
!
! Configure console and VTY lines
line con 0
username <ConsoleUsername>
enable password <EnablePassword>
!
! Configure login banner
banner motd #
