

## Coronavirus Disease (COVID-19) Decontamination/1030290 Cleaning Services

**Fast, Safe and thorough Coronavirus (COVID-19) decontamination services.**

As Coronavirus (COVID-19) continues to spread, the need for disinfection, decontamination and disposal are high in demand. The World Health Organization (WHO) has officially named the disease caused by the 2019 novel Coronavirus: COVID-19. The virus previously known as 2019-nCoV has been named SARS Co-V-2 by the International Committee on Taxonomy of Viruses. The 2019 Novel Coronavirus (COVID-19) is a new virus identified as the cause of an outbreak of respiratory illness first detected in Wuhan, China.

## Coronavirus Mitigation

The U.S. Center for Disease Control highly recommends you professionally disinfect your business, home, or facility if you suspect potential contamination. The recent outbreak of the Coronavirus should remind all of us of the importance of keeping our facilities, plant, and equipment clean and disinfected for employees and customers.

Take proactive measures by performing periodic cleanings to help mitigate and reduce the potential impact of an outbreak from a virus-like Coronavirus, Ebola, flu, or other serious contagions, such as blood-borne pathogens, and even toxic chemicals. Routine facility cleanings will help keep your customers and employees healthy and reduce employee absenteeism.

- Ebola, Coronavirus and other infectious diseases
- Accidental Death
- Homicide Crime Scene
- Suicide, Decomposition
- Accident or Injury
- Bloodborne Pathogen / Communicable Disease Cleanup and Containment
