SOIL PRO I

Testing Program

Variable rate fertilization and fumigation for nematodes and diseases.

This soil test includes:

pH	Magnesium
Phosphorus	Sulfur
Potassium	Sodium
Calcium	

\$70
Per Sample

Nematode Testing

Root Knot
Root Lesion
Stubby Root
Stunt

Onion Diseases

Pink Root
Wire Worm

Potato Diseases

Verticillium
Black Dot
Wire Worm

One tablespoon of soil will be removed from each samples thoroughly mixed and ran for a Complete Soil Test #1: pH, texture, soluble salts (ECe), Cation Exchange Capacity (true), percent lime, percent organic matter, nitrates, ammonium, phosphorus (alkaline soils - sodium bicarbonate extract, acid soils - Bray extract), potassium, calcium, magnesium, sodium, zinc, iron, manganese, copper, sulfates and boron.

Collecting Fee: \$5.50 per sample

A minimum of 10 samples is required to qualify for this program.
