

PRESS RELEASE

August 10, 2011

After the critically acclaimed “The Tom Carlile Feel” album was released to a smashing success heading back to the studio to follow up that album would be an intimidating process to many. If Tom took Nashville by storm with his first country album his follow up release rewrote the rulebook on how to put out a collection of hits. While most artists struggle to match the success of their popular debut album and fall back into obscurity Tom completely took his talents to a new level. This album shows not only a great leap in his songwriting ability but from beginning to end may be the most complete modern country album ever released. Each and every song on it’s own has “chart topping” catchy rhythms and lyrics that are instantly memorable long after hearing them for the first time. Tom’s maturity and confidence as a songwriter and performer really shine throughout each and every track. If the “Feel album” introduced Tom to the country music industry then the “Burnin album” made it clear his time had come. As an artist Tom has really reached the top of his game and clearly will be there for a long time to come.
