Core Competencies

- **Comprehensive Security Services:** Elite Affiliations LLC supports government agencies with unarmed and armed security, executive security, and cyber security services.
- **Tailored Solutions:** We provide customized solutions to meet the unique challenges faced by government entities.
- **Cutting-Edge Technology:** We leverage advanced technology to deliver robust protection and strategic intelligence.
- **Highly Trained Team:** Our team is highly trained to ensure safety and operational excellence.
- **Mission Support:** We empower agencies to fulfill their missions effectively and securely.
- **Versatile Protection:** Whether safeguarding critical infrastructure or providing discreet protection for high-profile individuals, we uphold the highest standards of security and reliability.

Differentiators

- **Utilizes AI-driven threat detection, blockchain for secure transactions, and zero-trust architecture for network security.** Implements encrypted hardware solutions, including self-encrypting drives and hardware security modules (HSM). Deploys advanced surveillance systems with facial recognition and behavior analysis.
- **Customized Security Solutions:** Develops tailored security plans specific to each government agency's needs. Integrates bespoke software and access control systems for optimal protection
- **Extensive knowledge in unarmed and armed security, executive protection, and cyber security.** Deploys specialized teams in counter-terrorism and digital forensics.
- **Adheres to strict confidentiality protocols and non-disclosure agreements.** Implements secure communication channels with end-to-end encryption.

NAICS Code/ Company Data

- **561612-** Security Guards and Patrol Services
- **561620-** Security Systems Services
- **561600-** Investigation and Security Services
- **54151-** Highly Adaptive Cybersecurity Services

Past Performance

Keys to the City: A reputable security booking agency that provides both unarmed and armed security services for various events and facilities. We ensured the safety of personnel and maintained a secure environment through a tailored approach and skilled security personnel, demonstrating our capability in managing diverse security needs.

Vaxcare: A vaccine technology company that manages vaccine administration and inventory in medical offices using advanced medical devices. We delivered comprehensive cyber security solutions to protect sensitive healthcare data and infrastructure, including threat detection, network security, and data protection, ensuring Vaxcare's operations remained secure and compliant with industry standards.

Social Mobile: A company specializing in cyber security services for telecommunications devices. We implemented robust cyber security measures to safeguard their infrastructure and sensitive information. Our proactive approach included continuous monitoring, vulnerability assessments, and incident response, providing Social Mobile with a secure and resilient cyber environment.
