

## Shock Index for ACS 2022 Trauma Field Triage

**Heart Rate > Systolic BP =  
POSITIVE Shock Index**

Clinical use for patients  
over 10 years

Shock Index > 1 = + High  
Risk for Mortality

Take to the Highest  
Trauma Center in your  
Region

Shock index is an earlier identification of shock than just blood pressure. Patients with a positive shock index have higher mortality in trauma. Example: HR of 120 and SBP of 110 = POSITIVE Shock Index
