

Connex Personnel is currently seeking experienced CGS HSE Advisor's for an upcoming oil and gas project.

There are 2 positions available (6-month & 18-month), both are site based. This position will conduct verification and assurance activities that will help ensure that the project construction contractors are meeting operations integrity objectives and health, safety and environmental (HSE) performance goals. These goals and objectives will be aligned with the company's Operations Integrity Management System (COIMS) and the Project's Health, Safety, Environment and Security (HSES) Standards.

**Responsibilities:**

The individual in this position is responsible for providing technical and functional HSE support during the construction of the project. This position is construction site/field based.

Conduct audits and inspections using the iAuditor verification tool.

Conduct and/or review quality of incident investigations.

Facilitate partnership for safety program where required.

Audit performance of contractor's safety management system.

Coach and mentor company and contractor reps in safety management and safe work practices.

Participate in hazard and risk assessments.

**Deliverables:**

This position works with company site project management along with Contractor's HSE representatives to ensure the project meets assigned goals and objectives related to HSE performance.

**Competencies:**

The individual in this position will exhibit the following organizational competencies:

Safely drives results, enables agility, communicates with impact, fosters collaboration.

The individual is self-motivated to ensure the timely completion of project requirements.

Ability to conduct audits and inspections, in addition to conducting and reviewing quality of incident investigations.

Possess excellent computer skills and proficient with Microsoft Office applications (Word, Excel, and PowerPoint).

Knowledge of local regulatory requirements.
