

Connex Personnel is currently recruiting for Construction Management Representative's (CMRs) for Civil Works for WABTS Installation of new Transformer T5.

CMRs are needed to support the installation of new transformer T5 located in the Wabush Terminal Station, located in Wabush, NL.

The complete schedule for this work is planned from June 18 until approximately July 30, 2024. The transformer will be electrically tested in situ, undressed and jack and rolled from its existing pad to a new pad located elsewhere in the yard. Once removed civil works for the new pad, including drainage and an oil retention system, will be installed. The existing transformer will be redressed and electrically tested in its new location.

The following civil work require a CMR; jack and roll existing T5 to a new pad in the terminal station, preparation and pouring of a new pad to accept the new T5, digging and installation of drainage and an oil retention system for the new T5, jack and roll new T5 inside yard to the newly poured new location.

Acting on behalf of the Engineering Services Dept., the CMRs are responsible for daily inspection reports, participation in daily tailboards, ensuring the contractor is following safety plans and work scopes, and ensuring the contractor is following proper work practices.
