

Connex Personnel is currently seeking a Construction Management Representative (CMR) for work in Soldiers Pond.

The position includes interfacing with contractors, site, and project management teams.

The CMR will need to be the onsite management for the following scope:

All infrastructure is to be removed from site and either properly disposed of or may be salvaged by Contractor if desired. Note there may be a presence of mold within the office complex, appropriate PPE and disposal methods will be required.

The infrastructure to be removed include the following:

- Office Trailer Complex, including:
 - o Associated decking;
 - o Any associated water and sewer piping;
 - o Foundation and/or blocking; and
 - o Disconnection of electrical (to be confirmed).

- Septic Field to be removed entirely:
 - o 1500 gal. concrete tank to be emptied and removed;
 - o Distribution box and piping to be removed; and
 - o Waste material to be properly disposed of.

- Drilled well to be decommissioned as per DOEC in the Guidelines for Sealing Groundwater Wells:
 - o Well shall be sealed to prevent undesirable exchange of water from aquifer to another;
 - o Shall preferably be filled with near cement grout;
 - o Shall have fill materials other than cement grout or concrete, disinfected and free of foreign materials; and
 - o When filled with cement grout or concrete, these materials shall be applied to the well hole through a pipe tremie or bailer.

The contractor is expected to mobilize to site in May 2023
The current schedule is expected to be completed in July 2023
