

## Wellsite Geologist

**Connex Personnel Inc.** is searching for a **Wellsite Geologist** on behalf of our client, **Equinor**. This is an offshore opportunity based in St. John's, NL.

### Job Description:

- Contribute to obtain Equinor's HSE goals by active participation in the HSE work on the rig/platform.
- Ensure compliance with Equinor's security requirements.
- Ensure that established routines for wellsite geology work is being followed.
- Continuously follow up well signals and evaluate pore pressure and borehole stability. Contribute to avoid well control incidents. (Extremely important for HPHT wells)
- Ensure that data acquisition is performed in accordance with activity program, detailed operations procedures and best practice.
- Perform quality control of drilling and geological data related to formation evaluation.
- Supervise service companies related to data acquisition.
- Immediately inform the Drilling Supervisor about geo operational issues that can influence safety, cost or well objectives. Advise on geological and reservoir technical issues.
- Ensure that all non-conformances are immediately discussed with the Operations Geologist, and properly documented.
- Keep the Operations Geologist continuously posted about well status.
- Prepare preliminary interpretations based on all data available and contribute to the final geological well products.
- Ensure that geological reports and logs are prepared and finalized.
- Wellsite geologists involved in drilling of HPHT wells and MPD (managed pressure drilling) shall be competent and familiar with the equipment and operational procedures. The following E-learning courses are mandatory:
  - Well integrity basic
  - D&W Safety Standard

### Qualifications:

- Master degree and 4+ years relevant experience (including HPHT experience), OR
- Bachelor degree and 6+ years relevant experience (including HPHT experience)

### Duration:

- These positions will start from March 24, 2024 with offshore rotation starting May 1, 2024 to 130 days into September 2024.
