

Connex Personnel is currently seeking a **Construction Management Representative (CMR)** to join its engineering and project management team to act as Construction Management Representatives (CMR) to support the execution of a project on the Labrador Island Link (LIL) in Labrador and on the island.

**Project Scope:**

CMR support is required for assistance with the **LIL Upgrades project**. Contractor work includes but is not limited to support for the contractor in the movement and installation of air spoilers in three locations – Labrador, south of Goose Bay approximately 2.5 hours (approximately structure 500), near Forteau (approximately structure 1210) and on the northern part of the island.

**Requirements:**

- The Construction Management Representative (CMR) will be NL Hydro's site representative during project construction and commissioning.
- Reporting to the Contract Manager, the CMR provides daily contractor project execution oversight and coordination at NL Hydro facilities for assigned capital project(s).
- The CMR ensures contractors abide by approved plans and procedures during mobilization and project start-up, including coordination with NL Hydro's operations and maintenance teams. The CMR ensures all contractor personnel receive site orientation and site-specific safety training before working at the project site.
- The CMR participates in contractors' project kick-off meetings and daily toolbox meetings. The CMR provides daily coordination between the contractor and NL Hydro site supervision and management, attending coordination meetings as required by plant management.
- The CMR monitors contractor safety, resources, work performance and work quality through continuous site observation and record keeping (daily reports).
- The CMR ensures contractors' work scopes are completed, with any allowable carry-over punch list items recorded prior to project commissioning. The CMR participates in project commissioning and contractor demobilization, supporting overall completions activities.
- The CMR represents NL Hydro's frontline for construction project oversight, supported by the technical and management resources of Engineering Services. The CMR's effective communication between contractors and project Stakeholders is key to ensuring projects are executed safely and efficiently.
- The CMR provides oversight of NL Hydro's safety plans, environmental plans, and oversight of contractor's quality plan.
- Resources shall have good communications skills and be assertive with contractor as required.
- Resources shall discuss site issues with NL Hydro engineering or contract manager multiple times per day.
- Familiarity with NL Hydro processes and procedures is an asset.

**Special Conditions:**

- A valid driver's license will be required.
- Previous experience with UHV transmission lines is required.
- Ability to hold a permit under WPC is required
- WHMIS, Power Line hazards and standard first aid is required.

**Location:** Various, NL

**Anticipated Start Date:** September 11 2025

**Anticipated End Date:** Oct 1 2025

**Estimated Effort Time:** 12 hour days (including travel).
