

Connex Personnel is currently seeking a **Project Engineer – Protection & Controls/Electrical** to join an engineering and project management team within the utilities sector and support the execution of projects throughout Newfoundland and Labrador.

KEY RESPONSIBILITIES

- Provide technical support to the Project Manager on various projects;
- Review tender packages prepared by other consultants and contractors;
- Review shop drawings prepared by contractors and vendors;
- Prepare tender packages for contracts;
- Prepare requests for proposals (RFPs);
- Provide technical input as a design team member for projects and other technical documentation;
- Direct and supervise consultants and contractors during the completion of specific engagements;
- Review and approve reports prepared by consultants;
- Attend Factory Acceptance Tests (FAT) as required;
- Conduct regular site visits to monitor construction activities, verify project progress, and provide support to site teams;
- Facilitate effective communication across stakeholders;
- Review and approve technical documentation, including commissioning;
- Assist with project closeout activities, ensuring smooth transition of completed assets to operations;
- Promote continual improvement through lessons learned, innovative approaches, and sharing best practices with other project teams;
- Submit timesheets and documentation in accordance with project management requirements;
- Other duties as assigned.

EDUCATION AND EXPERIENCE REQUIRED

- Electrical Engineering Degree, registered with the Professional Engineers and Geoscientists of Newfoundland and Labrador (PEGNL) association;
- 8 years or more experience since graduation;
- Experience in the configuration and programming of PLCs and DCS;
- Experience in network architecture design;
- Experience in preparing and using logic and wiring diagrams;
- Experience in supervising equipment installation and commissioning;
- Relevant experience in complex, multi-discipline projects;
- Experience in selecting, setting and troubleshooting protective relays;
- A working knowledge of communication protocols;
- Proven and demonstrated communication skills;
- Ability to thrive as a participant and/or leader within a multi-discipline team of both internal and external resources;
- Relevant experience in the design, implementation and troubleshooting of protection and or control systems in general with emphasis on hydro generation plants or electrical transmission systems or equivalent;
- Experience in design, managing construction contracts and commissioning;
- Experience in preparing project estimates;
- Excellent computer skills including a working knowledge of Microsoft Office;
- Ability to adapt to dynamic work environments and changing project demands.
- Valid certifications in WHMIS 2015, Emergency First Aid, Defensive Driving, Powerline Hazards, Confined Space awareness and Fall Protection.

Hours: 37.5 hours per week, Monday to Friday from 08:30 AM to 04:30 PM.

Location: Head office in St. John's, NL. Travel to Labrador and other site locations may be required.

Anticipated Start Date: February 23, 2026

Anticipated End Date: December 31, 2026 * with possibility of extension

Estimated Effort Time: 37.5 hours per week

Please submit your resume to hr@connexpersonnel.com
